INDEPENDENT AUDITORS' REPORT

of

Audit Firm Inter-audit Crowe Limited Liability Company

on the annual financial statements of

Joint-Stock Company

"Commercial Bank Globus"

for the year ended 31 December 2023

Contents

#1310

29 April 2024 Kyiv

This report is addressed to:

- Shareholders and management of JOINT-STOCK COMPANY “COMMERCIAL BANK GLOBUS”;
- The National Bank of Ukraine;
- The National Commission on Securities and Stock Market

I. Report on the financial statements

Opinion

We have audited the financial statements of JOINT-STOCK COMPANY “COMMERCIAL BANK GLOBUS" (the "Bank”), which comprise the statement of financial position (Balance sheet) as at 31 December 2023 Statement of profit or loss and other comprehensive income (Income statement), Statement of changes in equity, and Statement of cash flows (direct method) for the year then ended, and notes, comprising a summary of significant accounting policies.

In our opinion, the accompanying financial statements of JOINT-STOCK COMPANY “COMMERCIAL BANK GLOBUS” present fairly, in all material aspects, the financial position of the Bank as at 31 December 2023, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditors’ Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Bank in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in Ukraine, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material Uncertainty Related to Going Concern

We draw attention to Note 3 and Note 35, which provide information on the apparent negative impact of the on-going war, and provide separate information on the impact of this issue on the Bank's financial performance. This information indicates that a material uncertainty exists that may cast significant doubt on the Bank's ability to continue as a going concern.

As stated in Note 3, a material uncertainty exists that may cast significant doubt on the Bank's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Key Audit Matters Incorporating the Most Significant Risks of Material Misstatements, Including a Risk of Material Misstatements Due to Fraud:

Key audit matters are those matters that, in our professional judgement, were of significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matter described below to be the key audit matter to be communicated in our report.

Impairment of loans and assessment of credit quality

We focused our attention on this area because management makes complex professional judgments about the probabilities of recognizing impairment and estimating the amount of expected credit losses. Such professional judgment is applied before the occurrence of default events and includes the determination of the amount of expected credit losses arising from the occurrence of all possible default events during the expected term of the loan.

Identification of significant increase in credit risk and impairment and assessment of the recoverable amount involves certain assumptions and analysis of various factors, including borrower creditworthiness, expected cash flows, observable market prices and fair value of collateral.

Provisions for impairment reflect the management's assessment of expected losses on loan portfolios and customers' indebtedness to the Bank.

Note 4 "Significant accounting policies" and Note 8 "Loans and advances to customers" to the financial statements provide detailed information regarding the allowance for expected credit losses.

Our audit approach

We checked a sample of loans comprising the most part of the Bank's total portfolio. Our audit addressed the following matters:

- Assessing approaches to evaluation of expected credit losses and distributing the loans by impairment stage depending on the changes in the exposure to credit risks;
- Assessing internal controls used by management in calculating provisions and determining the amount of expected credit losses on loans;
- Completeness of evidence of impairment analysed by management, correctness of present value of expected cash flows, including those related to sale of collateral;
- Testing input data and assessing assumptions, as well as default event identification model based on borrowers' creditworthiness assessment;
- We have assessed completeness and correctness of disclosures in the Bank's financial statements with regard to provisions for expected credit losses on loans and advances to customers.

Other information

Management Report

Management is responsible for the information included in the Management Report and the Corporate Governance Report comprising a constituent part thereof, prepared in accordance with the Law of Ukraine “On Accounting and Financial Reporting in Ukraine” and the Law of Ukraine “On Financial Services and State Regulation of Financial Service Markets”, that includes other information, but does not include the financial statements and our auditors' report thereon.

We expect other information comprising the Annual Information of Securities Issuer to be made available to us subsequent to the date of this auditors' report.

Our opinion on the financial statements does not cover the other information in the Management Report, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information in the Management Report and the Corporate Governance Report comprising a constituent part thereof, and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on the other information that we have obtained prior to the date of this auditors' report, we conclude that there is a material misstatement of this other information, we are required to report that fact.

If, upon reading the Annual Information of Securities Issuer, we draw a conclusion that its is significantly misstated, we will have to communicate this matter to the Supervisory Board and the National Commission on Securities and Stock Markets (NCSSM).

Responsibilities of Management and Those Charged with Governance and Financial Reporting

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

The Supervisory Board is responsible for overseeing the Bank's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion; The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control;
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management;
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair;
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Bank to express an opinion on the financial statements.

We communicate with the Supervisory Board regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Supervisory Board with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the Supervisory Board, we determine those matters that were of most significance in the audit of the financial statements of the reporting period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Mandatory information to be disclosed in accordance with Article 14.4 of the Law of Ukraine "On Audit of Financial Statements and Auditing Activity"

In accordance with Article 14 of the Law of Ukraine "On Audit of Financial Statements and Auditing Activity", our auditors' report includes additional information related to the audit of the financial statements of JOINT-STOCK COMPANY "COMMERCIAL BANK GLOBUS" for 2023

The body that appointed the auditor	Supervisory Board of JOINT-STOCK COMPANY "COMMERCIAL BANK GLOBUS"
Auditor appointment date	Resolution of the Supervisory Board of the Bank dated 28 September 2023
Total uninterrupted period of audit engagements, taking into account any extensions and re-appointments	4th year
Description and assessment of risk of	*Risk of material misstatement* is the risk

material misstatement, particularly due to fraud	that the financial statements are materially misstated prior to audit. Description and assessment of these risks is provided in paragraphs “Material Uncertainty Related to Going Concern and “Key Audit Matters” above.
Reference to relevant item or other disclosure in the financial statements for each description and assessment of the risk of material misstatement in the audited financial statements	The areas of possible material misstatement that we assessed in the course of planning our audit relate to the asset lines "Loans and advances to customers" and "Other assets" in the Statement of financial position (Balance sheet) and "Net impairment loss" in the Statement of profit or loss" in terms of recognition of impairment losses on financial assets. Based on our procedures, nothing has come to our attention to cause us to believe that the financial statements are materially misstated, whether due to fraud or error.
Summary of measures taken by the auditor to mitigate such risks Key reservations with regard to such risks	Summary of measures taken by the auditor to mitigate such risks, and key reservations with regard to such risks are set out in the Key Audit Matters section above.
Explanations on the audit findings in respect of inconsistencies, particularly due to fraud	During our audit, no inconsistencies have come to our attention in excess of the level of materiality acceptable for this audit engagement that would require adjustment to the financial statements issued by the Bank.
Confirmation of consistency of the auditors’ report with the additional report to the Audit Committee	This auditors’ report is consistent with the additional report to the Supervisory Board of JOINT-STOCK COMPANY “COMMERCIAL BANK GLOBUS”
Representation on non-provision of prohibited services and independence of the lead engagement partner and audit firm of the audited entity	We declare that no prohibited services were provided by Audit Firm Inter-Audit Crowe LLC, and our employees engaged in the audit are independent of the Bank and have not provided any services to the Bank.
Information on non-audit services provided by the auditor to the Bank or entities under the Bank’s control that have not been disclosed in the Management Report or in the financial statements	Audit Firm Inter-Audit Crowe LLC has not provided any services to the Bank other than this statutory audit in 2023.
Explanations on the scope of the audit and inherent limitations	The scope of our audit procedures in accordance with ISAs is designed to obtain

reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and obtain appropriate audit evidence to express an opinion on the financial statements of the Bank.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists

Information on the check of the Report on Corporate Governance	In accordance with Article 11.7 of Law of Ukraine No. 996-X IV "On Accounting and Financial Reporting in Ukraine" dated 16 July 1999, the Management Report (Corporate Governance Report) is submitted together with the separate financial statements and consolidated financial statements under the procedure and within the timeframe established by the law. During our reading and check of the information contained in the Management Report (Corporate Governance Report), we concluded that the Corporate Governance Report contained sufficient and appropriate information to be disclosed in accordance with the regulations of the National Bank of Ukraine.

***

In accordance with the Law of Ukraine “On Banks and Banking”, Regulation of the National Bank of Ukraine on submittal of an auditors’ report on the annual financial statements adopted by Resolution No 90 of the National Bank of Ukraine Management Board dated 2 August 2018, additional information on the auditors’ opinion on: compliance (fair presentation) of the data on the Bank’s assets and liabilities structure by maturity in the statistical report prepared by the Bank for submission to the National Bank of Ukraine as at 1 January 2024, and on compliance with the National Bank’ s regulations on: internal control; internal audit; assessment of exposure to credit risk on asset-side transactions; recognition of transactions and balances with the related parties; capital adequacy, taking into account quality of the Bank’s assets; and maintenance of accounting records is set forth in the Report on the compliance with other regulations of the National Bank of Ukraine section of this report.

The lead engagement partner on the audit resulting in this independent auditors’ report is Yevgen M. Baran.

II. Report on Other Legal and Regulatory Requirements of the National Bank of Ukraine

We have prepared an Auditors' report dated 29 April 2024.

In accordance with Article 69 of the Law of Ukraine "On Banks and Banking" and paragraph 27 of Regulation of the National Bank of Ukraine on submittal of an auditors' report on the annual financial statements adopted by Resolution No 90 of the National Bank of Ukraine Management Board dated 2 August 2018 (hereinafter "Resolution No 90"), we have provided additional information (assessment) related to the annual financial statements for 2023.

The Report on the compliance with other regulations of the National Bank of Ukraine contains information on compliance (fair presentation) of the data on the Bank's assets and liabilities structure by maturity in the statistical report prepared by the Bank for submission to the National Bank of Ukraine as at 1 January 2024, and on compliance with the National Bank' s regulations on:

- internal control;
- internal audit;
- assessment of exposure to credit risk on asset-side transactions;
- recognition of transactions and balances with the related parties;
- capital adequacy, taking into account quality of the Bank's assets;
- maintenance of accounting records.

The matters set out below were considered solely within the scope of our audit of the Bank's financial statements for 2023 based on a sample testing and materiality principle, as well as our analysis of the subsequent events in accordance with International Standards on Auditing.

Our procedures did not seek to identify all the weaknesses or other irregularities that may exist and, therefore, they should not be construed as an assurance of absence of any weaknesses and/or irregularities in the operations of JOINT-STOCK COMPANY "COMMERCIAL BANK GLOBUS".

Our approach to compliance with regulatory requirements on disclosure of information

Our findings mainly concern the matters outlined in paragraph 27 of Regulation No 90 above. In case of any inconsistencies identified in the Bank's administrative data and internal procedures, we assess the impact of such matter or the risks of weaknesses in the Bank's internal controls.

Compliance (fair presentation) of the data on the Bank's assets and liabilities structure by maturity in the statistical report

In the preparation of the A7X "Data on the structure of assets and liabilities by maturity" statistical reporting file as at 1 January 2024 used for calculation of liquidity ratios in accordance with the procedure set forth in “Instruction on the procedure for regulation of banking activities in Ukraine”, approved by Resolution of the National Bank of Ukraine Management Board No.368 dated 28 August 2001, as amended, the Bank complied with regulatory requirements of the National Bank of Ukraine.

During our audit, nothing has come to our attention that caused us to believe that the A7X "Data on the structure of assets and liabilities by maturity” statistical reporting data as at 1 January 2024 that do not form a part of the set of the annual financial statements are invalid.

Compliance of the Bank with the National Bank’ s regulations on:

Internal control

Based on the results of our audit, it was established that, based on the findings of the inspection conducted by the National Bank of Ukraine as at 1 December 2023, the Bank is taking measures to bring its internal documents and internal controls into compliance with the requirements of the Regulation on the Organisation of the Internal Control System in Ukrainian Banks and Banking Groups approved by Resolution No. 88 of the Management Board of the National Bank of Ukraine dated 2 July 2019 (as amended) and to update internal documents in accordance with Regulation on Risk Management Framework in Ukrainian Banks and Banking Groups approved by Resolution No. 64 of Management Board of the National Bank of Ukraine dated 11 June 2018 (as amended), taking into account the deficiencies identified by the above mentioned inspection.

As a result of our audit procedures performed as part of the audit of the annual financial statements, we have determined that the Bank has taken into account and subsequently implemented measures to address the deficiencies in the organisation of the internal control and risk management system and corporate governance issues identified during the inspection.

Internal audit

Internal audit function is one of the fundamental components of the Bank’s overall internal control system. Due to the matters related to the internal control system as described in the previous paragraph of this report, we are unable to conclude that the internal audit system are free of certain deficiencies.

The Bank's internal regulatory documents governing internal audit procedures meet the requirements of the NBU's regulatory and legal acts, in particular, Resolution of the National Bank of Ukraine No. 311 of 10 May 2016 "On approval of the Regulation on the organization of internal audit in banks of Ukraine". Internal audit procedures are carried out in compliance with the requirements of the Bank's internal regulations. However, we noted issues in respect of complete coverage of risk areas by audit procedures.

Assessment of exposure to credit risk on asset-side transactions

The exposure to credit risk as at the reporting date calculated by the Bank subject to regulations of the National Bank, including the "Regulation on the assessment of the credit risk from asset-side banking operations by banks of Ukraine” approved by NBU Board Resolution No. 351 dated 30 June 2016 (as amended) (hereinafter “NBU Resolution No. 351) is generally in line, in all material aspects, with the requirements in effect.

Recognition of transactions and balances with the related parties

In conducting our audit, we studied relevant information and assessed the Bank's processes to identify the related parties in accordance with the requirements of the National Bank of Ukraine and IFRS, obtained necessary explanations from management on related party transactions, and analysed the Bank's contracts with the related parties and minutes of the meetings of the Bank's collegial bodies.

We did not identify any transactions of the Bank with the related parties on the terms other than the terms of transactions with other borrowers or creditors. We evaluated the risk related to the Bank's lending transactions with the related parties as moderate.

We did not identify any material inconsistencies with IFRS in respect of related party transactions disclosed in the "Related party transactions" note to the Bank's financial statements.

Capital adequacy, taking into account quality of the Bank's assets

The information on the Bank's authorised capital, equity and movements in reserves and other funds is disclosed in the respective financial statements and notes to the annual financial statements.

The Bank's regulatory capital calculated in accordance with "Instruction on the procedure for regulation of banking activities in Ukraine", approved by Resolution of the National Bank of Ukraine Management Board No.368 dated 28 August 2001, as amended, and subject to requirements of the National Bank of Ukraine on the preparation of statistical report 6DX "Data on compliance with economic ratios and open currency position limits" submitted to the National Bank of Ukraine as at 31 December 2023 amounted to UAH 745,728 thousand. (31 December 2022: UAH 519,292 thousand).

The regulatory capital adequacy ratio under statutory requirements should be at least 10%. As at 31 December 2023, the Bank's actual regulatory capital adequacy ratio was 19.86%.

The amount of regulatory capital taking into account the effect of the issues related to our assessment of credit risk and underprovided credit risk per Assessment of exposure to credit risk on asset-side transactions sufficient to perform the Bank's licensed activity.

Maintenance of accounting records

The Bank generally maintains its accounting records in accordance with the NBU regulations and the Bank's accounting policy.

In our opinion, during the reporting year the Bank's accounting:

was in line with the regulations of the National Bank of Ukraine;

ensured the appropriate level of compliance with the internal regulations.

III. Report on Other Legal and Regulatory Requirements

General

In accordance with the Decision of the National Commission for Securities and the Stock Market No. 555 of 22.07.2021 “On Approval of Requirements for Information Related to the Audit or Review of the Financial Statements of Participants in the Capital Markets and Organized Commodity Markets, which are Supervised by the National Commission for Securities and the Stock Market” we provide additional information related to the annual financial statements for 2023.

Full name of the entity	JOINT-STOCK COMPANY JOINT-STOCK COMPANY “COMMERCIAL BANK GLOBUS”
List of participants (shareholders) (for individuals - surname, first name and middle name; for legal entities - name, ownership form, location) that own 5% or more of shares (participatory interests) as of the date of preparation of the auditor’s report, specifying the actual percentage	LIMITED LIABILITY COMPANY “UKRAINIAN MEDIA TECHNOLOGIES” Kyiv, Ukraine 100.00%

In our opinion, the Bank fully discloses the information on ultimate beneficial owners and ownership structure as of the date of the check in accordance with the requirements of the law. The ultimate beneficiary owner of JSC CB GLOBUS is Olena Sylniahina.

As at 31 December 2023, the Bank was not a controller/participant of a non-banking financial group and is a public interest entity.

As at the date of the Annual Financial Statements, 31 December 2023 and the date of this auditor’s report, JOINT-STOCK COMPANY “COMMERCIAL BANK GLOBUS” has no subsidiaries/parent.

The requirement to calculate prudential indicators per Clause 3, Section I of "Regulations on prudential standards of professional activity on the stock market and risk management requirements" approved by Resolution No. 1597 the National Commission for Securities and the Stock Market No. 1597 dated 1 October 2015 does not apply to banks.

Reporting in accordance with the requirements of Article 127 of the Law of Ukraine "On Capital Markets and Organized Commodity Markets”

The Bank is required to engage an auditor to express his opinion on the information in the Management Report specified in clauses 5-9 of Article 127.3 of the Law of Ukraine "On Capital Markets and Organized Commodity Markets", as well as to check the information in the Management Report specified in clauses 1-4 of Article 127.3 of the Law.

Opinion

In our opinion, the Management Report, which is not part of the financial statements, does not contain omissions information and is in line the effective structure and corporate governance requirements adopted by the Bank. This statement applies to the following information:

- description of the main characteristics of the issuer's internal controls and risk management framework;
- list of persons who directly or indirectly own a significant block of the issuer's shares;

- information on any restrictions on the participatory and voting of the shareholders (participants) at the issuer's general meeting;
- the procedure for appointing and dismissing the issuer's officials;
- powers of the issuer's officials.

We have checked other sections of the Management Report. If, based on the work we have performed on the Management Report that we have obtained prior to the date of this auditor' s report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard. Other sections of the Management Report do not contravene the financial statements and our knowledge of the Bank obtained during the audit.

Note 1. Background

JOINT-STOCK COMPANY “COMMERCIAL BANK GLOBUS”, which, in accordance with para 1.3 of the Articles of Association, is the successor of rights and liabilities of the Open Joint Stock Company “Commercial Bank Globus” (hereinafter – the Bank), was established on 22 January 2007 by decision of the Meeting of Founders.

Limited Liability Company “UKRAINIAN MEDIA TECHNOLOGIES” is the founder of the Bank.

JSC “CB GLOBUS” was registered on 29 November 2007 by the National Bank of Ukraine, in witness whereof a respective record was made in the State Register of Banks, according to which Certificate No. 320 was issued.

The Bank is registered and located at:

19/5 Kurenivsky Lane, Kyiv 04073, Ukraine.

JSC “CB GLOBUS” is incorporated as a joint stock Company.

The Bank’s governing bodies are:

- General Meeting of Shareholders of the Bank;
- Supervisory Board of the Bank;
- Management Board of the Bank.

According to the staffing schedule, the Bank had 608 employees as at 31 December 2023 (31 December 2022: 569 employees).

BUSINESS PROFILE

According to the Articles of Association, JSC “CB GLOBUS” is a universal banking institution that operates within the territory of Ukraine in accordance with the applicable law and regulations of the National Bank of Ukraine.

ACTIVITIES

The Bank provides services in accordance with the Law of Ukraine “On Banks and Banking Activity”, the Articles of Association, and to the extent allowed under the licenses granted by the National Bank of Ukraine.

JSC “CB GLOBUS” conducts operations on the Ukrainian banking services market on the basis of Banking Licence No. 240 of 21 January 2019 issued by the National Bank of Ukraine.

The Bank provides a wide range of banking services to its customers in accordance with the Law of Ukraine “On Banks and Banking Activity” as set out below:

- attracting deposits in monetary resources and precious bank metals that can be placed by an unlimited number of entities and individuals;
- opening and maintenance of current accounts for customers and correspondent banks, including those in bank metals, and escrows;

- placement of the funds and bank metals on deposits and current accounts on the Bank's own behalf, on its own terms and conditions and at its own risk;
- provision of advisory and information services on the banking and other financial services;
- provision of services to individuals and entities in the trading of cash and non-cash currency valuables and immediate crediting of these valuables to their accounts in accordance with the Law of Ukraine "On Currency and Currency Transactions";
- organisation of purchase and sales of securities on the customer's behalf;
- operations on securities markets on its own behalf (including underwriting);
- operations related to the depository activity of a depository institution;
- storage of valuables or rental of a personal bank safe;
- transactions on behalf of customers or on their own behalf, with:
  - money market instruments;
  - foreign exchange rate or interest based instruments;
  - financial futures and options.

In addition, JSC "CB GLOBUS" holds the following licenses from the National Commission on Securities and Stock Markets (NCSSM) for professional activities in the stock market:

License AE No.263178 – Professional activity in the stock market – dealing in securities (dealership);

License AE No.263177 – Professional activity in the stock market – dealing in securities (brokerage);

License AE No.263375 – Professional activity in the stock market – depository activities of a depository institution.

pursuant to NCSSM Resolution No. 1061 dated 4 November 2021. The Bank was granted a license to carry out activities related to custody of assets of collective investment institutions

As at 31 December 2023, JSC "CB GLOBUS", had correspondence relations with 11 banks, including with one non-resident banks, in particular, JSC Khalyk Bank, Almaty, Kazakhstan; STONEX FINANCIAL LTD, London, United Kingdom of Great Britain and Northern Ireland. The number of correspondence nostro accounts (38) and vostro accounts (9) is sufficient to ensure the settlement with counterparties in the fastest way possible.

JSC "CB GLOBUS" is an active member of the following interbank associations and international organisations:

- Deposit Guarantee Fund (Certificate No. 193);
- an incumbent member of the Independent Association of Banks of Ukraine;
- an incumbent member of the Perspektyva Stock Exchange;
- an incumbent member of PJSC "Ukrainian Exchange";
- Society for Worldwide Interbank Financial Telecommunication (SWIFT);
- Ukrainian National SWIFT Member and User Group "UkrSWIFT";
- Professional Association of Capital Markets and Derivatives;
- National Depositary of Ukraine;
- PrJSC "First Ukrainian Bureau of Credit Histories";
- RIA, IntelExpress, TransferGo and AVERS №1; money transfer systems;
- MasterCard Worldwide;
- Ukrainian Network of Integrity and Compliance (UNIC).

JSC CB GLOBUS is a participant of the state mortgage programme eOselya ("eHousing") as part of the Affordable Loans 5-7-9% programme, which is implemented by the Government of Ukraine on the initiative of the President of Ukraine through the Entrepreneurship Development Fund.

JSC CB GLOBUS is a user of KredInfo (interbank loan information system), UkrDealing information and dealing system, NBU's Ukrainian Interbank FX Market Agreement Confirmation System, REUTERS, and Bloomberg.

STRATEGIC GOAL

The key goal of the Bank defined by its shareholders is to earn profit by providing a full scope of domestic and international bank services, including, without limitation, commercial, investing, depositary and any other activity that may be permitted to the banks under the effective Ukrainian legislation.

During 2023, PJSC CB GLOBUS continued all of its activities. However, given the current situation in Ukraine, the Bank's key objective was to ensure compliance with its risk mitigation and reduction policy. Lending to legal entities and individuals, foreign exchange trading on behalf of clients, currency exchange operations, cash and settlement services to legal entities and individuals, attracting deposits from legal entities and individuals, securities trading, and treasury operations were the main development areas of the Bank in the reporting period.

The main priorities of the Bank include a client-oriented approach, high professionalism and efficiency.

SUMMARY RESULTS OF BANKING SERVICES AND OTHER OPERATIONS

The proft of JSC "CB GLOBUS" for the reporting period amounted to UAH 39,843 thousand.

Interest income accounts for the largest share in the Bank's revenue structure - 68%, or UAH 1,389,734 thousand.

Interest expenses comprise 43%, or UAH 842,491 thousand in the expense structure of 2023.

As at 31 December 2023, equity amounted to UAH 687,184 thousand.

The regulatory capital calculated using the methodology of the National Bank of Ukraine amounted to UAH 745,757 thousand.

COUNTERPARTY DESCRIPTION BY SEGMENT

Customer base establishment and expansion has been one of the top priorities for JSC "CB GLOBUS" since its establishment. As at 31 December 2023, JSC "CB GLOBUS" had 111,708 counterparties.

The Bank's counterparty base

Counterparty segment	Number of counterparties	
	2023	2022
Banks	75	75
Corporate customers	8,094	8,498
Individuals	103,539	69,253
Total counterparties	**111,708**	**77,826**

The share of each segment in the Bank's counterparty structure as at 31 December 2023 is as follows:

- banks - 0.07%;
- corporate customers - 7.25%;
- individuals – 92.68%.

In 2023, similarly to prior reporting years, management of the Bank focused on expansion of its customer base and diversification of the resource base to reduce liquidity and insolvency risks for PJSC CB GLOBUS that might arise from acute fluctuations of balances on customer accounts.

DISCONTINUED OPERATIONS

Throughout 2023, JSC "CB GLOBUS" had no asset ownership restrictions imposed, nor was it subject to any types of ownership termination restrictions.

During the reporting period, there were no mergers, acquisitions, splits or spin-offs of the Bank.

ORGANISATION AND CORPORATE GOVERNANCE

The overall organisational structure of JSC "CB GLOBUS" (hereinafter – the Structure) was developed on the basis of the applicable law of Ukraine and the Articles of Association. It consists of the governance bodies, controlling bodies, executive bodies and structural units.

The Bank's governing bodies are the General Meeting of the Shareholders, the Supervisory Board, and the Management Board, which is also an executive body. The Bank's controlling bodies are the Supervisory Board, Audit Committee, Internal Audit Service, and Compliance Unit.

The Bank's internal control structure comprises three levels:

- Level 1 – business and supporting units;
- Level 2 – Risk Management and Compliance;
- Level 3 – Internal Audit.

The General Meeting of Shareholders is the supreme governing body of the Bank. The General Meeting of Shareholders carries out general management of the Bank's operations, sets the objectives and development strategy, adopts decisions on amending/revising the Articles of Association, makes changes to the Share Capital, approves the Bank’s operating results, profit allocation procedure, procedure and periods for paying shares of profit, loss coverage procedure.

The Bank has the following collegiate bodies:

- Asset/Liability Committee (ALCO);
- Credit Committee;
- Tariff Committee;
- Audit Committee;
- Financial Monitoring Committee.

All decisions adopted by committees are documented and notified to the authorised officers of the Bank. Committee meetings are held as needed, but at least on a monthly basis.

MANAGEMENT SHARE IN THE BANK’S EQUITY

According to the Articles of Association, management of the Bank consists of the Chairperson and members of the Supervisory Board, Chairperson, his/her deputies and members of the Management Board, Chief Accountant and his/her deputies. Management of the Bank has no direct shareholding in the Share Capital. Olena Anatoliivna Sylniahina, indirectly holds 100% of shares in the share capital. The Chairman of the Supervisory Board, Dmytro Eduardovych Polkovskyi, indirectly holds 16.198866%. The Chairman of the Management Board, Serhiy Hennadiyovych Mamedov, indirectly holds 9.899307%.

SIGNIFICANT INTEREST IN THE BANK

The ultimate beneficiary owner as at 31 December 2023 is Olena Anatoliivna Sylniahina - by holding 50.5% of the share capital of KETLEN LTD that owns a 99.993% share in UMT Ltd holding 100% in the share capital of the Bank. A participant in UMT Ltd (0.007%) that owns 100% of the share capital of the Bank. It owns a significant interest in the Bank equal to 100%.

Indirect owners of significant interest in the Bank:

KETLEN LTD - through ownership of 99.993% of the share capital of UKRAINIAN MEDIA TECHNOLOGIES Ltd; It owns a significant interest in the Bank equal to 100%.

Olena Anatoliivna Sylniahina (individual/natural person) - by holding 50.5% of the share capital of KETLEN LTD that owns a 99.993% share in UMT Ltd holding 100% in the share capital of the Bank. A participant in UMT Ltd (0.007%) that owns 100% of the share capital of the Bank. It owns a significant interest in the Bank equal to 100%.

Dmytro Eduardovych Polkovskyi (individual/natural person) - by holding 16.2% of the share capital of KETLEN LTD that owns a 99.993% share in UMT Ltd holding 100% in the share capital of the Bank. He owns a significant interest in the Bank equal to 16.198866%.

Approved for issuance and signed on 29 April 2024.

Chairman of the Management Board Serhiy MAMEDOV

Chief Accountant Alina LIPATOVA

Note 2. Economic environment of the Bank

The full-scale war and related security threats pose a key systemic risk to the national economy and financial sector. Due to significant military spending, the economy will remain highly dependent on international financial aid. In recent months, the risks of irregularity in the flow of aid and a decline in its volume have increased, which is now a major threat to macroeconomic stability. However, the chances of a successful agreement on financial aid packages by partners currently appear high. Therefore, the NBU's baseline scenario for 2024 assumes that the macroeconomic preconditions for the stable operation of the financial sector remain in place: further economic growth, single-digit inflation, controllability of the foreign exchange market, and continued attractiveness of hryvnia assets.

Despite fierce fighting, the frontline barely moved in 2023. The more powerful weapons received from our partners have increased the effectiveness of the defence forces, but the pace of their delivery is still rather slow. Given this, active hostilities will last longer than expected, and significant security risks will remain. At the same time, weapons production for Ukraine is being established both inside and outside the country. The EU's security guarantee project for Ukraine provides for long-term support in the form of weapons supply and military training programmes. In the summer and autumn, Russian terrorist air attacks focused on export infrastructure, primarily grain transshipment facilities.

After a long pause, hryvnia lending has resumed.The volume of hryvnia loans to businesses has been growing for six consecutive months. Improved financial standing of companies and a pick-up in business activity increased the demand for and supply of loans. Hryvnia corporate lending continues to be fuelled primarily by the government's Affordable Loans 5-7-9% programme. Credit risk-sharing mechanisms, either through the government's portfolio guarantee programme or through instruments of international financial institutions, will be an essential component of lending support. Retail unsecured consumer and mortgage loans are growing. Mortgage lending is currently carried out almost exclusively under the government's eOselya programme. Concessionary mortgages are gaining momentum and reaching a growing number of people.
In 2023, revenues and profitability of real sector companies increased, and manufacturers' expectations improved. Almost all key industries are increasing production and sales volumes. Companies' debt burdens are also returning to normality. Asset quality assessments have confirmed that most banks have adequately assessed credit risk. Due to favourable economic conditions, the share of non-performing loans has almost not increased this year, and banks did not have to recognise additional credit losses. Unless any additional shocks occur, active lending will continue and acceptable portfolio quality will be maintained.

The credit risk of the retail portfolio is moderate. Its quality is gradually improving, with a decreasing share of loans overdue by more than 30 days. However, banks' expectations regarding loan quality are still restrained. Business credit risk has decreased. The further recovery of economic activity in the second half of 2023 contributed to an improvement in the financial position of companies in most industries. Alongside this, their debt burden decreased. Default rates in the corporate loan portfolio have declined significantly.
The business continues to maintain positive, albeit restrained expectations of future changes in business activity.

In 2023, the NBU Board made four decisions to reduce the key policy rate by setting it:

- from 28 July 2023 at 22%;

- from 15 September 2023 at 20%;

- from 27 October 2023 at 16%;

- from 15 December 2023 at 15%.

Starting July 2022, the official UAH/USD exchange rate was fixed at UAH 36.5686 per USD 1. Starting from 3 October 2023, the National Bank of Ukraine switched to a managed exchange rate flexibility regime. Under this regime, the official exchange rate is determined daily based on the interbank market rate, rather than being set by the National Bank of Ukraine in accordance with its Management Board Resolution No. 18, as it had been since 24 February 2022. The managed flexibility of the exchange rate differs from the floating exchange rate regime that was in place in Ukraine before the outbreak of the full-scale war. With managed exchange rate flexibility, the National Bank compensates for the structural shortage of foreign currency in the market and significantly smooths out exchange rate changes.

High interest margins and operational efficiency give banks a strong safety margin and will continue to drive pre-tax profit growth. However, the banks' income will now be taxed at higher rates: 50% in 2023 and 25% thereafter. Higher tax rates are a new permanent factor that will reduce the profitability of the banking business and the pace at which banks replenish capital.

Whilst management believes it is taking appropriate measures to support the sustainability of the Bank's business in the current circumstances, realization of the risks arising from the war could negatively affect the Bank's results and financial position in a manner not currently determinable.

JSC CB GLOBUS continues to work without interruption. The Bank is implementing measures to strengthen its resilience to operational risks and maintain business continuity even in the face of uncertainty about the duration of hostilities.

These financial statements reflect management's current assessment of the impact of the Ukrainian business environment on the operating activities and the financial position of the Bank. Future operating conditions may differ from management's assessments.

Note 3. Basis of preparation

These financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) on the historical cost basis, except for measurements of certain financial instruments at fair value.

The financial statements are presented in Ukrainian hryvnia (UAH), and all values are rounded to the nearest thousand (UAH '000), unless otherwise stated.

Statement of compliance

The Bank's financial statements are prepared in accordance with IFRS as issued by the International Accounting Standards Board (IASB).

Basis of presentation

Items of the statement of financial position are generally presented in accordance with their liquidity. The analysis of the recoverability or settlement of assets and liabilities with a breakdown of those being settled or recovered within 12 months after the date of the statement of financial position (current/short-term) and more than 12 months after the date of the statement of financial position (non-current/long-term) is presented in Note 21.

Financial assets and liabilities are offset, and the net amount is recognised in the statement of financial position when, and only when, the entity has a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. Income and expenses are offset only to an extent that the offset is required or permitted by the respective financial reporting standard or interpretation as specified in the Bank’s accounting policy.

The accounting policies below do not include new standards, amendments to standards, and interpretations that are optional in 2023.

Going concern

Management of the Bank carried out an assessment of the existing significant uncertainty related to military actions on the territory of Ukraine, which are ongoing and have already caused and continue to cause significant negative consequences both for the economy of Ukraine as a whole and for the Bank's clients in particular, based on the assessments underlying management’s going concern assumptions.

In the near future, the Bank will continue to function under martial law within the framework of the current model.

Management believes that the Bank has sufficient margin of safety to operate as a going concern and observes a tendency to stabilize the situation in the Bank.

At the same time, management recognizes that the Bank's future activity, like the entire financial system of the country, will depend on further events on the battle front, and the unpredictability of these events, the duration of hostilities and their impact on the state of the economy indicate that a material uncertainty exists regarding the ability of the country's banking system and the Bank itself to continue as a going concern.

In 2023, no changes were made to contracts (financial assets) that led to significant changes in cash flows that would require termination of the old financial instrument and the recognition of a new one or the need to recalculate (change) the effective interest rate.

Restructuring of loan agreements carried out during 2023 provided for the extension of the loan agreements and, accordingly, reduction of the amount of monthly repayments of the loan principal. All restructurings were solely conditional on the customers' timely repayment of the loan interest.

If the military aggression is stopped in the nearest months, or the hostilities are localised in the eastern part of Ukraine, the Bank expects credit losses to be incurred only in the regions that are most affected by the warfare. Given that the Bank did not perform operations in the Donetsk and Luhansk regions, nor did it have significant loan portfolio concentrations in Zaporizhzhia, Kherson, and Mykolaiv regions, the bank believes the increase in credit risks will not lead to significant credit losses.

From 24 February 2022 to 31 August 2023, the Bank did not perform any valuation of collateral due to the absence of an active market.From 24 February 2022 to 31 August 2023, the Bank did not perform any valuation of collateral due to the absence of an active market. At the same time, given that almost all loans by the Bank are granted in Ukrainian hryvnias, and the loan collateral is mainly represented by residential real estate, motor vehicles and specialized equipment, the value of which, according to the Bank's expectations, will not decrease after the war (taking into account the prospects of Ukraine's accession to the European Union, and expected investments in Ukraine announced by foreign governments), the Bank does not expect a decrease in the loan portfolio coverage ratio due to impairment of collateral.

Starting 31 August 2023, the Bank resumed periodic revaluations of collateral used as a security for calculating credit risk exposure and making provisions for asset-based transactions.

During 2022, part of property, equipment and intangible assets and right-of-use assets were located in the occupied territories, particularly in the city of Kherson. In autumn 2022, Kherson was de-occupied. Access to the property is currently restricted by the military administration. Operations of the Kherson branch were temporarily suspended until stabilisation of the security situation. In April 2023, an inventory-taking of the branch was carried out (Inventory-Taking Act of 26 April 2023). Based on the results of the inventory, there was no damage to the property of the Kherson branch. Impairment of the assets was not assessed to their immaterial residual value.

JSC CB GLOBUS provides a specific range of services that primarily includes issuing targeted loans for the purchase of real estate, motor cars, specialized vehicles and machinery, and providing bid bonds and performance guarantees to enterprises that are parties to government contracts. Therefore, the Bank's main income is derived from interest and commission on loans granted before the start of full-scale aggression and commission income from guarantees provided. Taking into account, among other things, the social, stabilising importance of lending operations with retail customers and small businesses, the Bank continues to grant loans even during martial law, albeit in a much smaller volume and with more stringent requirements with regard to borrowers' solvency. The Bank is an active participant of the government lending programmes. Also, the Bank continues to actively work with companies participating in government tenders, issuing bid bonds and providing contract performance guarantees.

Facing increased uncertainty regarding potential future economic scenarios under the conditions of martial law and its impact on all areas of life, the Bank continues to constantly and regularly review its estimates, models and approaches to reflect information in accounting and financial reporting in a relevant, fair and reliable manner.

Note 4. Significant accounting policies

The Bank's accounting policies are formed in accordance with the applicable law of Ukraine, regulations of the National Bank of Ukraine and are based on International Financial Reporting Standards.

The underlying principles of the Bank's accounting policy include fair presentation, substance over form, standalone basis, prudence, going concern, accrual and matching of income and expenses, consistency, and historical cost basis.

Measurement methods and principles applied to specific assets and liabilities are set out below.

The procedure of accounting for operations performed by the Bank is governed by separate internal documents that constitute a part of the Bank's Accounting Policies.

Note 4.1. Basis of measurement

Financial instruments are measured at fair value or amortised cost depending on their classification. The measurement methods are described below.

Fair value measurement

Fair value (FV) is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between participants of the principal market or the most advantageous market at the measurement date. The Bank determines the fair value of financial instruments on the basis of prices obtained directly from external data or using valuation techniques. A financial instrument is considered to be quoted in an active market, if quoted prices are readily and regularly available from a stock exchange or other organisation, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

Where the market for a financial instrument is not active, the Bank uses the data on the latest transactions between unrelated parties to determine the current fair value. The amounts received as a result of forced write-offs do not represent fair values.

Valuation techniques such as discounted cash flow models or models based on recent arm's length transactions or analysis of financial data about the investees are used to measure the fair value of certain financial instruments for which external market pricing information is not available. Applying these valuation techniques may require assumptions that are not supported with market data. These financial statements contain disclosures on events when substitution of any such assumption by a feasible alternative may result in significant changes in the reported profits, revenues and total assets or liabilities.

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial instrument. An incremental cost is one that would not have been incurred if the transaction had not taken place. Transaction costs include fees and commissions paid to agents (including employees acting as selling agents), advisors, brokers and dealers, levies by regulatory agencies and securities exchanges, and transfer taxes and duties. Transaction costs do not include debt premiums or discounts, financing costs or internal administrative or holding costs.

Measurement at amortised cost

Amortised cost (AC) is the amount at which the financial instrument was recognised at initial recognition less any principal repayments, plus accrued interest, and for financial assets less any write-down for incurred impairment losses. Accrued interest includes amortisation of transaction costs deferred at initial recognition and of any premium or discount to maturity amount using the effective interest method. Accrued interest income and accrued interest expense, including both accrued coupon and amortised discount or premium (including fees deferred at origination, if any), are not presented separately and are included in the carrying values of related items in the statement of financial position.

The effective interest method is a method of allocating interest income or interest expense over the relevant period, so as to achieve a constant periodic rate of interest (effective interest rate) on the carrying amount.

Effective interest rate is the rate that exactly discounts estimated future cash payments or receipts (excluding future credit losses) through the expected life of the financial instrument or a shorter period, if appropriate, to the net carrying amount of the financial instrument. The effective interest rate discounts cash flows of variable interest instruments to the next interest repricing date, except for the premium or discount which reflects the credit spread over the floating rate specified in the instrument, or other variables that are not reset to market rates. Such premiums or discounts are amortised over the whole expected life of the instrument. The present value calculation includes all fees paid or received between parties to the contract that are an integral part of the effective interest rate.

Note 4.2. Initial recognition of financial instruments

Financial instruments carried at fair value through profit or loss (FVTPL) on initial recognition are measured by the Bank at their fair value less transaction costs. The Bank carries transaction costs on purchase of these financial instruments on the expense account at the transaction date.

All other financial instruments on initial recognition are measured at fair value plus transaction cost.

All financial liabilities, except for those designated as at FVTPL and those arising when the transfer of a financial asset carried at fair value does not qualify for derecognition, are measured at amortised cost using the effective interest method. Premiums and discounts, including initial transaction costs, are included in the book value of the respective instrument and amortized using the effective interest method for this instrument.

Note 4.3. Classification of financial assets

A financial asset is measured at amortized cost only if it meets both of the following conditions and is not designated as asset at fair value through profit or loss:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and

- its contractual terms give rise on specified dates to contractual cash flows that are solely payments of principal and interest on principal amount outstanding (SPPI).

A financial asset is measured at fair value through other comprehensive income (FVOCI) only if it meets both of the following conditions and is not designated at the Bank's discretion as at FVTPL:

- the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and

- its contractual terms give rise on specified dates to contractual cash flows that are solely payments of principal and interest on principal amount outstanding.

All financial assets not qualifying for measurement at AC or FVOCI as described above, are measured at FVTPL In addition, on initial recognition, the Bank may irrevocably categorize a financial asset that would otherwise be qualified as asset at amortized cost or FVOCI as FVTPL asset if such categorization eliminates or significantly reduces irregularities in the accounting records that could have originated otherwise.

Business model assessment

The Bank will make an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information that is considered includes:

- the stated policies and objectives for the portfolio of the financial assets and the operation of those policies in practice, particularly whether management’s strategy focuses on earning contractual interest revenue, maintaining a particular interest rate profile, matching the maturities of the financial assets to the maturities of the liabilities that are funding those assets or utilizing cash flows through the sale of assets;

- how the performance of the portfolio is evaluated and reported to the Bank’s management;

- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;

- the frequency, volume and timing of sales in prior periods, the reasons for such sales, and expectations about the future sales. However, information on sales levels is not considered in isolation, but as part of a holistic analysis of how the Bank achieves its objective of financial assets management and how cash flows are generated.

Financial assets held for trading and those managed and performance reviewed on a fair value basis are measured at FVTPL because they are held neither to collect contractual cash flows nor to both collect contractual cash flows and to sell financial assets.

Recognized financial assets are reclassified only if the business model of the Bank transactions changes.

Assessment of whether contractual cash flows are exclusively the payment of principal and interest

For the purposes of this assessment, "principal" is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as profit margin.

In assessing whether the contractual cash flows are solely repayment of principal and interest on principal amount outstanding ("SPPI" criterion), the Bank will analyse the contractual terms of the financial instrument. This will include assessing whether the financial asset contains a contractual term that could change the timing or amount of the contractual cash flows such that it would not meet this condition.

Note 4.4. Impairment

IFRS 9 requires the Bank to apply significant judgements over how changes in economic factors affect expected credit losses (ECLs), which will be determined on a probability-weighted basis.

Such new impairment model applies to the following financial instruments that are not measured at FVTPL:

- financial assets that are debt instruments;
- lease receivables; and
- loan commitments and financial guarantee contracts (previously the impairment was measured in accordance with IAS 37 Provisions, Contingent Liabilities and Contingent Assets).

Allowances for expected credit losses are recognized by the Bank in an amount equal to either 12-month ECLs or lifetime ECLs of an instrument.

The Bank assesses the quality of financial assets as follows:

- if the credit risk of the financial instrument has not increased significantly since the initial recognition, then the loss allowance for that financial asset is equal to the amount of 12-month ECLs;
- if there has been a significant increase in credit risk since the initial recognition, the Bank recognises a loss allowance for that financial asset at an amount equal to lifetime ECLs;

Assessment of expected credit losses

ECLs are a probability-weighted estimate of credit losses and will be measured as follows:

- for financial assets that are not credit-impaired at the reporting date: the present value of all cash shortfalls – i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Bank expects to receive;
- financial assets that are credit-impaired at the reporting date: as the difference between the gross

carrying amount and the present value of estimated future cash flows;

- for undrawn loan commitments: the present value of the difference between the contractual cash flows that are due to the Bank if the commitment is drawn down and the cash flows that the Bank expects to receive; and

- for financial guarantee contracts: the present value of the expected payments to reimburse the holder less any amounts that the Bank expects to recover.

Significant increase in credit risk and definition of default

In determining whether there is a significant increase in credit risk (i.e. risk of default) of a financial instrument since its initial recognition, the Bank considers valid and verifiable information that is relevant and accessible without excessive cost or effort, including both quantitative and qualitative information, as well as an analysis based on the Bank's historical experience, an expert assessment of loan quality and forward-looking information.

For identifying whether there is a significant increase in credit risk or a default event, the Bank uses the internal methodology.

For calculating an allowance, the Bank allocates financial assets by individually significant and not individually significant.

For impaired and individually significant assets, impairment is determined on an individual basis. For financial assets that are not individually significant and not impaired, impairment is determined on a collective basis.

Financial assets are written off against related provisions when there is no reasonable expectation of recovery according to the Bank's management.

Note 4.5. Derecognition and contract modification

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised where:

- The rights to receive cash flows from the financial asset have expired;

- the Bank has transferred its rights to receive contractual cash flows from that asset, or if it has retained the right to receive cash flows of the asset, but has assumed a contractual obligation to pay them in full without material delay to a third party under a pass-through arrangement;

- the Bank has transferred substantially all the risks and rewards of the asset, or has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Bank has transferred its rights to receive cash flows from an asset, and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Bank's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of original carrying amount of the asset or the maximum amount of consideration that the Bank could be required to repay.

The transfer of assets results in derecogntion if the Bank has transferred substantially all risks and rewards of the asset and is transferring control of the asset.

Financial liabilities are derecognised when the respective obligations are discharged, cancelled or expired.

If an existing financial liability is replaced by another liability to the same creditor on substantially different terms or in the event of material changes to the terms of an existing liability, the original liability is derecognized, and the new one is recorded in the accounting with the recognizing the difference between the extinguished liability and new financial liability carrying amount in the statement of profit or loss and other comprehensive income.

The Bank recognizes the changes of the contractual terms or modifications of the financial asset that leads to revising the related cash flows as follows:

- the initial financial asset is derecognized, and the new one is recognized; or

- the initial financial asset continues to be recognized under the new terms.

When the contract on a financial asset is renegotiated or otherwise modified and the renegotiation or modification does not result in the derecognition of that financial asset, the Bank is to recalculate the gross carrying amount of the financial asset and recognise a modification gain or loss.

The Bank recalculates the gross carrying amount as the present value of the renegotiated or modified contractual cash flows that are discounted at the financial asset's original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired (POCI) financial assets).

Transaction costs are included in the carrying amount of the modified financial asset and amortised over its lifetime.

The difference between the gross carrying amount under original terms and the gross carrying amount under renegotiated or modified terms is recognised by the Bank as modification gain or loss.

Note 4.6. Cash and cash equivalents

Cash and cash equivalents include cash on hand; balances on the Bank's correspondent accounts in the National Bank of Ukraine that are not mandatory reserves; balances on correspondent bank accounts and cash in banks that are readily convertible to known amounts of cash at short notice and non-restricted cash balances that are subject to an insignificant risk of changes in value.

Balances restricted for use are eliminated from cash and cash equivalents. Cash and cash equivalents are carried at amortised cost.

Note 4.7. Mandatory reserves on accounts with the National Bank of Ukraine

The NBU cancelled the requirement to maintain mandatory reserves on a separate account that were restricted for use.

Note 4.8. Investments in securities

Financial assets designated at fair value through profit or loss comprise debt securities, shares and other financial investments held for trading, as well as those designated at fair value through profit or loss upon initial recognition.

Balances on financial assets measured at fair value through profit or loss are presented in the ***Statement of Financial Position (Balance Sheet)***. Gains less losses from trading financial assets measured at fair value through profit or loss are presented in the ***Statement of Profit or Loss and Other Comprehensive Income (Income Statement)*** and in the ***Statement of Cash Flows (direct method)***.

Note 4.9. Loans and other amounts due from banks

Loans and other amounts due from banks are recognised as financial assets under the caption Loans and receivables and initially measured at fair value (first day profit/loss) plus respective transaction costs.

Subsequently to the initial recognition, amounts due from banks are measured at amortised cost using the effective interest method. Loans and receivables without fixed maturities are measured at amortised cost based on their expected maturities.

Impairment of loans and amounts due from banks are recorded through special provisions. The carrying value of the asset is reduced by the amount of the provision for impairment. Impairment loss is recognised as expense in the statement of comprehensive income.

Interest income on loans granted to banks and deposits placed was recognised on interest income accounts using the effective interest method.

Note 4.10. Loans and advances to customers

Subsequently to the initial recognition, loans are measured at AC at the balance sheet date using the effective interest rate over the amortisation of the discount (premium) and interest accrual at least once in a month, or at FVTPL. The Bank's fees and commissions are treated as discount/interest income to the extent that such fees and commissions are paid by the customer and are related to the issue of the loan.

The Bank recognises interest income using the effective interest rate. In case of financial instruments for which future cash flows cannot be reliably measured (e.g. overdrafts, revolving credit facilities) and to which the effective interest rate cannot be applied, the Bank recognises interest income applying nominal interest rate.

In the financial statements for 2023, the results from transactions on loan debt of the Bank's customers are stated in the ***Statement of Profit or Loss and Other Comprehensive Income (Income Statement)*** and the ***Statement of Cash Flows*** (direct method) as a net (increase)/decrease in loans and advances to customers.

Loans issued to customers are stated in the ***Statement of Financial Position (Balance Sheet)*** as the carrying amount less special provisions for credit risk (Note 8).

Note 4.11. Reverse purchase/repurchase contracts

Securities sold under sale and repurchase (repo) contracts are accounted for as secured financing transactions, with the securities retained in the statement of financial position and the counterparty liability included in amounts payable under repo transactions.

Securities purchased under reverse repo contracts are treated as accounts receivable on reverse repo transactions. The difference between the purchase and repurchase price is the interest income and is recognised in profit or loss over the term of the repo contract. Accounts receivable under reverse repo contracts is recognised net of provision for impairment losses. Where assets acquired under the repo contract are sold to a third party, the obligation to repurchase securities is recognised as trade payables and is measured at fair value.

In repo transactions, the Bank as a buyer receives consideration in the form of interest or the difference from reverse repurchase of securities at the price above the discounted purchase, and, therefore, different accounting treatment is applied to interest income in repo transactions depending on the form of consideration.

The Bank's expenses incurred in reverse repo transactions are amortised over the entire term of the agreement.

Under repo contracts with infinite term, the latter is determined on a forward- looking basis depending on the expected maturity.

Note 4.12. Investment property

Property (land or a building—or part of a building—or both) held by the Bank or by the lessee under a finance lease to earn rentals or for capital appreciation or both is classified as investment property.

If the Bank gains the title for land plots and buildings by realising its pledge holder rights where future use is undetermined, such assets are also classified as investment property.

Upon initial recognition, investment property is measured and recognised at cost that includes its purchasing price and all costs directly attributable to the purchase.

During the reporting year, the Bank changed the treatment of investment property from historical cost basis to fair value basis.

In accordance with the historical cost principle, all assets other than land plots were depreciated on a straight-line basis at a depreciation rate of 4% and with a useful life of 25 years. When owning the investment property, depreciation was charged on buildings and not on land plots.

According to the 2020 accounting policies, the cost approach was selected during the reporting year for further accounting. Under such approach, the fair value of the Bank's investment property was determined based on reports of the independent appraiser. The carrying amount of the investment property at the reporting date matches its fair value.

Costs of the day-to-day servicing, repairs and maintenance of an investment property item are recognised under the heading ***"Administrative and other operating expenses***" in the ***Statement of Profit or Loss and Other Comprehensive Income (Income Statement)*** in the period in which they are incurred.

Operating lease income from investment property is disclosed in ***line 1 Table 9.3 Note 9***.

Information about investment property is presented in the ***Statement of Financial Position (Balance Sheet)*** under the caption **"Investment property"** and in ***Note 9***.

Note 4.13. Property, equipment and intangible assets

Property, equipment and intangible assets are carried at historical cost less any accumulated depreciation and amortisation and accumulated impairment losses.

Historical cost of property and equipment includes its cost plus all related costs of its acquisition, delivery, installation and commissioning.

All of the Bank’s intangible assets have finite useful lives and primarily include computer software and software licences.

The carrying amounts of property, equipment and intangible assets are depreciated/amortised over their expected useful lives for the purpose of their gradual retirement. Depreciation/amortisation is charged on a straight-line basis.

In 2023, the useful lives of property equipment and intangible assets were not revised. The useful life of intangible assets is determined in accordance with internal regulations of the Bank.

An item of property and equipment and intangible assets is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset.

The Bank assesses at the end of each reporting period whether there is any indication that an asset may be impaired. Where the carrying amount of the asset exceeds the recoverable amount, the carrying amount is written down to its recoverable amount.

The Bank recognises depreciation charges on property, plant and equipment under the caption ***“Depreciation and amortisation expenses***” in the ***Statement of Profit or Loss and Other Comprehensive Income (Income Statement)***.

Gain or loss arising from disposal of property and equipment (calculated as the difference between the net proceeds from disposal and the carrying amount of the asset) are recognised in other operating income or under the caption ***“Administrative and other operating expenses”*** in the ***Statement of Profit or Loss and Other Comprehensive Income (Income Statement)***.

Expenses incurred to maintain property and equipment are recognised under the caption ***“Administrative and other operating expenses”*** in the Statement of ***Profit or Loss and Other Comprehensive Income (Income Statement)*** when incurred.

The Bank did not revaluate the historical cost of property and equipment during the reporting year.

The residual value of property and equipment is nil.

Information about the property, plant and equipment is presented in the ***Statement of Financial Position (Balance Sheet) within Property, equipment and right-of-use assets***, in Note 10 and in the ***Statement of Cash Flows (direct method)***.

Note 4.14. Operating leases in which the Bank is the lessor and/or lessee

During the current year, the Bank applied IFRS 16 Leases that is effective for annual periods beginning on 1 January 2020. IFRS 16 introduced new or amended lease accounting requirements. The standard introduced significant changes to lessee accounting by removing the distinction between operating and finance lease and requiring the recognition of a right-of-use asset and a lease liability at commencement of all leases, other than short-term leases and leases of low-value assets. Unlike the lessee accounting, the lessor accounting requirements have remained largely unchanged.

The date of first adoption of IFRS 16 for the Bank is 1 January 2019.

The Bank applied IFRS 16 retrospectively and the cumulative effect of initially applying IFRS 16 is recognised at the date of first adoption. Accordingly, comparative figures were not restated.

Upon the first adoption of IFRS 16 for all leases (except for those specified below), the Bank:

- recognised the right-of-use assets and lease liabilities initially measured at the present value of future lease payments in the separate statement of financial position;

- recognised the depreciation of right-of-use assets and interest on lease liabilities in the statement of profit or loss;

- presented expenses within operating expenses as part of profit or loss.

The Bank applied a single discount rate for the portfolio of leases with similar characteristics.

Effect on lessor accounting

IFRS 16 does not significantly change the lessor accounting. Under IFRS 16, the lessor continues to classify leases as finance or operating lease and account for these two types of lease differently.

However, IFRS 16 changed and expanded the disclosure requirements, especially in terms of the lessor's risk management for the rights it retains in underlying assets.

Operating lease expenses are stated in ***line 2 Table 25.3 Note 25 Administrative and other operating expenses***.

In 2023, the Bank leased out its premises and land.

Lease payments under operating leases in which the Bank is a lessor are recognised as income on a straight-line basis over the term of the lease.

Lease income is stated in ***lines 2.5. and 2.6, Note 24 Other operating income***.

Note 4.15. Derivative financial instruments

In the normal course of business, the Bank enters into various derivative financial instruments, including forwards and swaps, for managing the currency risk and liquidity risk, as well as for trading purposes. Derivative financial instruments entered into by the Bank are not designated as hedges and do not qualify for hedge accounting. Derivatives are initially recognised at fair value at the date on which a derivative contract is entered into and are subsequently remeasured to fair value at each reporting date. All derivative instruments are carried as assets when fair value is positive and as liabilities when fair value is negative.

Derivative instruments are included to other assets or other liabilities in the separate statement of financial position. Gains or losses arising from these instruments are included in other income in the separate statement of profit or loss and other comprehensive income.

Note 4.16. Financial liabilities

Financial liabilities are classified either as financial liabilities at FVTPL or other financial liabilities.

Other financial liabilities. Other financial liabilities, including deposits and borrowings, are initially recognised at fair value less transaction costs. Other financial liabilities are subsequently carried at amortised cost using the effective interest method.

Effective interest rate is used to calculate the amortised cost of a financial liability and allocate interest expenses over the relevant period. For detailed information about the effective interest rate, refer to the “Net interest income” section above.

Derecognition of financial liabilities. The Bank derecognises financial liabilities when, and only when, its obligations are discharged or cancelled or expired.

The difference between the carrying amount of the financial liability derecognised and the consideration paid or payable is recognised in profit or loss.

Financial guarantee contracts. A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the terms of a debt instrument.

Financial guarantee contracts issued by the Bank are initially measured at fair value and are subsequently carried at the higher of:

- the amount of loss allowance determined under IFRS 9; and

- the amount initially recognised less, when appropriate, any cumulative amount of income

recognised in line with the Bank’s revenue recognition policy.

Financial guarantees are presented as reserves in the separate statement of financial position and their measurement is presented in other comprehensive income.

Note 4.17. Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include:

- foreign currency purchase and sale and conversion transactions (TOM and SPOT);

- standard acquisitions of financial investments (securities transferred within 10 business days) if the transaction date and settlement date are different.

Similarly to financial assets, financial liabilities are initially recognised at fair value, plus transaction costs directly attributable to their acquisition or issue. Transaction costs include payments to third parties that help conducting a transaction, but are neither buyers, nor sellers in the transaction.

When there is an active market, the fair value of a liability is its market price. If there is no active market, the financial liability is recognised at cost less impairment losses.

Financial liabilities are written off the balance sheet accounts at the date when a liability is discharged, settled or cancelled (incl. after the expiry date).

Note 4.18. Debt securities issued by the Bank

Own debt securities include savings (deposit) certificates issued by the Bank. Debt securities issued by the Bank are carried on accounts of Section 33 “Own debt securities and derivative financial liabilities”. The Bank issues registered savings (deposit) certificates.

Income on savings certificates is paid on demand.

For detailed information, see the note ***"Debt securities issued by the Bank"***.

Note 4.19. Provisions for liabilities.

Provisions for financial commitments are created to secure their fulfilment in the future, which is recognised as a liability in the Bank's balance sheet indicating the possible outflow of economic benefits associated with the fulfilment of such financial liabilities by the Bank.

Credit-related commitments include loan commitments, letters of credit, financial guarantees and bill avalisation.

Financial liabilities are initially recognised at fair value that typically equals commissions received (for guarantees). The commissions are amortised on a straight-line basis over the life of the commitment. At each reporting date, the financial guarantees are measured at the higher of the expenditure required to settle the commitment at the reporting date, and initially recognised balance less accumulated amortisation.

Factors taken into account when creating provisions for liabilities include: loss rate on lending transactions, credit conversion factor and the amount of consideration received gross of amortisation (for guarantees).

If the amount of provision increases in subsequent periods after the provision for granted financial liabilities is created, the Bank makes adjustments to the previously created provision for such liabilities.

Where it is required to fulfil the financial liability assumed, the Bank uses the respective provision created for that financial liability.

Provisions for contingent liabilities are estimated according to IAS 37 Provisions, Contingent Liabilities and Contingent Assets (hereinafter: IAS 37) which requires use of management estimates and judgements. Contingent liabilities are not recognized in the statement of financial position, but are disclosed in the notes to financial statements, except for the instances when the probability of outflow of resources is remote. Contingent assets are not recognised in the statement of financial position, but disclosed in the notes to financial statements if an inflow of economic benefits is probable.

For detailed information, see the Note "Provisions for liabilities" to the Statement of Financial Position (Balance Sheet) and the Note "Fee and commission income and expenses" to the Statement of Profit or Loss and Other Comprehensive Income (Income Statement).

Note 4.20. Subordinated debt

Subordinated debt comprises ordinary unsecured equity instruments that, under the contract, cannot be redeemed earlier than in five years, and rank after all other debts to creditors or investors should the issuer fall into liquidation or bankruptcy. Subordinated debt is recognised in equity, it may not exceed 50 percent of the capital stock, and is annually decreased by 20 per cent of its original amount over the last five years of the contractual term.

Subordinated debt is initially recognised at fair value, which equals to the amount of proceeds less transaction costs. In subsequent periods, the amount of liabilities is carried at amortised cost using the effective interest method.

Interest expenses from subordinated debt are recognised on a monthly basis using the effective interest rate by increasing the expenses. The advance payment of the interest on amounts borrowed through subordinated debt is not allowed. The capitalisation of interest on subordinated debt is not allowed.

Note 4.21. Income tax

Taxation. Income tax expense represents the sum of the current and deferred tax expense.

Current income tax.

Current income tax expenses are based on taxable profit for the year. Taxable profit differs from the financial profit before tax recognised in the separate statement of profit or loss and other comprehensive income, since it does not include items of income and expenses that are taxable or attributable to expenses in other periods and excludes items that are never taxable or attributable to expenses for taxation purposes. Current tax expenses of the Bank are calculated using the tax rate ruling during the reporting period.

Deferred income tax.

Deferred income tax is a tax that is expected to be paid or recovered for differences between the carrying amounts of assets and liabilities in the separate financial statements and appropriate tax base used in determining taxable profit, and is recognised using the balance sheet liability method.

Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilised. These assets are not recognised if the temporary differences arise from the initial recognition of other assets and liabilities in a transaction that affects neither taxable profit or accounting profit.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised.

Deferred tax is recognised in the separate statement of profit or loss and other comprehensive income, unless it relates to items that are directly attributable to equity items, in which case the deferred tax is also recognised in equity.

In Ukraine, there are other taxes that apply to the Bank’s business. These taxes are included as a component of operating expenses in the separate statement of profit or loss and other comprehensive income.

Information about the Bank's income tax liabilities is presented in the ***Statement of Financial Position (Balance Sheet)*** and in Note 28 to the ***Statement of Profit or Loss and Other Comprehensive Income (Income Statement)***.

Note 4.22. Share capital and share premium

Share capital contributions are recognised at cost. Share premium represents the excess of contributions received over the nominal value of shares issued. Gains and losses from the sale of own shares are included in share premium.

Dividends on ordinary shares are recognised in equity as a decrease in equity in the period in which dividends are declared.

Note 4.23. Reserves and other funds

The Bank's reserve fund is formed to cover contingent losses from banking operations. Amounts allocated to the reserve fund according to the Law of Ukraine "On Banks and Banking Activity" should be at least 5% of the Bank's net profit, but not more than 25% of the Bank's regulatory capital.

The reserve fund can be used only to cover the Bank's losses for the reporting year upon decision of the Supervisory Board in accordance with a procedure approved by the General Meeting of the Shareholders.

Note 4.24. Transactions with shareholders (owners)

During 2020 and 2021, the Bank received non-refundable financial assistance from the Bank's shareholder for the purpose of increasing the its equity. Such financial aid is not included in income based on Clause 4.25 of the Conceptual Framework for Financial Reporting, IAS 18.7 Revenue and IFRS 20.14, non-refundable financial aid from the Shareholder for the purpose of increasing the equity is accounted for using the equity method.

Note 4.25. Recognition of income and expenses

Income and expenses are recognised in accordance with the key principles of international financial reporting standards, namely: accrual, matching, prudence.

Income and expenses are accounted for on an accrual basis that requires all income and expenses to be recognised in the period in which they were incurred.

Interest income and expenses are recognised in the reporting period in which they were incurred and are calculated on an accrual basis using the effective interest method.

Note 4.26. Foreign currency translation

Transactions with foreign currencies and precious bank metals are initially recognised in the reporting currency by translating the foreign currency amount at the official exchange rate of UAH to foreign currencies ruling at the transaction date (i.e. the date on which assets, liabilities, equity, income and expenses are recognised).

Assets and liabilities denominated in foreign currencies and bank metals are stated in the Ukrainian hryvnia equivalent at the official exchange rate as at the reporting date or recognition date.

The Bank's monetary assets and liabilities are presented in the ***Statement of Financial Position (Balance Sheet)*** at the NBU's official Ukrainian hryvnia exchange rate to foreign currencies and bank metals as at the end of the period as follows:

Foreign currency exchange rates	31 December 2023 (UAH)	31 December 2022 (UAH)
USD 1.00	37.9824	36.5686
EUR 1.00	42.2079	38.9510
RUR 1.00	0.42119	0.50708

GBP 1.00	48.4883	44.0048
CHF 1.00	45.3846	39.5636
1 troy ounce of gold	78861.3400	66075.8000
PLN	9.7333	8.2984

The results of translation of assets and liabilities denominated in foreign currencies and bank metals are disclosed in the ***Statement of Profit or Loss and Other Comprehensive Income (Income Statement)*** and in the ***Statement of Cash Flows (direct method)***.

Note 4.27. Offsetting assets and liabilities

Financial assets and liabilities are offset and the net amount reported in the statement of financial position only to the extent there is a legally enforceable right to offset and there is an intention to realise the asset and settle the liability simultaneously.

During the reporting years 2023 and 2022, the Bank did not offset financial assets and liabilities.

Note 4.28. Inflation accounting

Ukraine was considered a hyperinflationary economy during the period ended 31 December 2000. As the Bank was founded and operated after that date, the provisions of IAS 29 Financial Reporting in Hyperinflationary Economies were not applied in the preparation of this report.

Note 4.29. Employee benefits and related charges

Wages, salaries, contributions to the state social insurance fund, paid annual leave and sick leave, bonuses, and non-monetary benefits are accrued in the year in which the associated services were rendered by the employees. According to the Ukrainian legislation, the Bank makes contributions to the following state social insurance funds: pension fund, social insurance against temporary disability, mandatory state social insurance against unemployment and casualty insurance.

Contributions made to the state social funds are expensed as incurred. Provisions for unused vacations and bonuses are recognised as a part of personnel expenses. The Bank has no other post-employment benefit obligations or other significant benefits that would require accrual.

Expenses associated with employee benefits and related charges are recognised under the caption “Employee benefits expense” in the ***Statement of Profit or Loss and Other Comprehensive Income (Income Statement)***.

Note 4.30. Operating segments

The Bank identifies the following operating segments:

- retail banking represented by individuals’ current accounts, deposits and loans; and
- corporate banking represented by direct corporate loans, current accounts, deposits, loan facilities and other credit products, dealing in foreign currencies and derivative products, as well as transactions with SMEs.

In addition, investment banking is another distinguished segment.

Note 4.31. Related party transactions

Parties are generally considered to be related if the parties are under common control or one party has the ability to control the other party or can exercise significant influence over the other party in making financial or operational decisions. In considering each possible related party relationship, attention is directed to the substance of the relationship, not merely the legal form. Related party transactions are disclosed in Note 36.

Note 4.32. Significant accounting estimates and judgements and their effect on recognition of assets and liabilities

The Bank uses estimates and assumptions that affect the amounts recognised in the financial statements and carrying amounts of assets and liabilities reported in the next financial year. Estimates and underlying assumptions are regularly reviewed based on management's historical experience and various other factors, including expectations of future events, which are believed to be reasonable under the circumstances. Management of the Bank also makes certain judgements, apart from those involving estimations, in the process of applying the accounting policies. Professional judgements that have the most significant effect on the amounts disclosed in the financial statements and estimates that may result in significant adjustments to the carrying amount of assets and liabilities during the next financial year include:

Impairment losses on loans and advances. Overdue debt on all loans to corporate, bank and retail customers is analysed monthly to determine the amount of impairment losses that are recognised by establishing impairment provisions. In addition, each category of loans is collectively assessed for impairment considering losses incurred in the past. This assessment considers the results of modelling the losses to maturity by the portfolios of loans that are past due, but were not individually assessed as impaired.

The Bank uses assumptions as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of loans before the decrease can be identified with an individual asset in that portfolio. Such indications may include observable data indicating adverse changes in the payment status of borrowers that are part of the group.

Management uses estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when scheduling its future cash flows. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

Reviewing financial assets for impairment involves creating provisions for the full amount of the net credit risk weighted for the corresponding provisioning rate for all types of lending transactions rather than only reviewing a financial asset or a group of financial assets for objective evidence of impairment.

Recognition of deferred income tax asset. The deferred tax assets recognised on the balance sheet is substantially the amount of tax losses incurred that can be recovered by future deductions from the taxable profit. Deferred income tax assets are recorded to the extent that realisation of the related tax credit is probable in accordance with the applicable law at the end of the reporting period. The future taxable profits and the amount of tax benefits that are probable in the future are based on the medium-term business plan prepared by management and extrapolated results thereafter. The business plan is based on management's expectations that are considered reasonable under the circumstances. Management expects a moderate increase in the Bank's corporate loan portfolio and credit quality improvement, further development of the personal financing, improvement of the range of banking products and services, which will result in the increase of the fee and commission income, implementation of effective expense control programmes, improved performance of its branches and further headcount optimisation. It should also be noted that as at 31 December 2022, the tax law of Ukraine does not limit the period of use of tax losses carried forward. Significant changes to the assumptions above about recognising a deferred tax asset can potentially result in the derecognition of a deferred income tax asset.

On a **historical cost** basis, the Bank's assets are carried in the amount of actual consideration given at the date of acquisition, while the liabilities are recorded at the amount of mobilised cash/deposits in exchange for the obligation. The Bank carries property, equipment and intangible assets and financial instruments (accounts receivable, securities and investments in associates and subsidiaries) at cost.

Market value is the amount that may be received from sale of an asset in an active market. When assets and liabilities are accounted for at their market value, assets are recognised in the amount of consideration that would be given to acquire the same assets at the current moment. Liabilities are recognised at the amount they are recognised at the amount required to make the current payment. The assets' carrying values are brought in line with their market value through revaluation.

Fair value is the price that would be received to sell an asset, or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Assets received for free and assets received as a result of exchanging for a dissimilar asset are carried at fair value.

Carrying value is the amount at which an asset is carried on a balance sheet less any accumulated depreciation or amortisation and accumulated impairment losses.

Effects of political situation

Because of the current situation, despite stabilisation measures that may be taken by the Ukrainian parliament, the government and the National Bank of Ukraine as at the date when these financial statements are approved for issue, Ukraine's economic environment appears to be affected by instability factors.

Economic instability may persist in the nearest future, and there is a possibility that the market value of the Bank's assets is lower than their carrying value, which may have a significant impact on the Bank's profitability.

Note 5. New and revised accounting pronouncements

The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the preparation of the annual financial statements for the year ended 31 December 2023, except for the adoption of the new standards described below, which are effective from 1 January 2023. The nature and the effect of these changes are disclosed below.

Effective 1 January 2023, the new IFRS 17 Insurance Contracts (hereinafter "IFRS 17") came into effect. IFRS 17 replaces IFRS 4 and is aimed at enhancing transparency in the accounting for insurance contracts. IFRS 17 sets out the recognition, measurement, presentation and disclosure principles for insurance contracts. This information is intended for users of financial statements to assess the impact of such contracts on the financial position, financial results and cash flows. The transition to IFRS 17 is carried out retrospectively. IFRS 17 shall not apply to financial guarantee contracts unless the issuer has previously expressly stated that it considers those contracts to be insurance contracts and has used the accounting applicable to insurance contracts, insurance contracts in which the bank is the policyholder, unless those contracts are reinsurance contracts held (IFRS 17.7).

Other amendments to IFRSs to be effective from 1 January 2023:

Amendments to IAS 1 Presentation of Financial Statements and IFRS Practice Statement 2 - Making Materiality Judgements;

Amendments to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors – Definition of Accounting Estimates;

Amendments to IAS 12 Income Taxes - Deferred Tax Related to Assets and Liabilities Arising from a Single Transaction;

Amendments to IFRS 17 – Initial Application of IFRS 17 and IFRS 9;

Amendments to IAS 12 Income Taxes – International Tax Reform — Pillar Two Model Rules (published on IASB website in 23 May 2023).

The amendments to IAS 1 Presentation of Financial Statements are aimed at helping to ensure that accounting policies are disclosed in a manner that is more useful to users, which particularly included: replacing the requirement to disclose material accounting policy information rather than significant accounting policies; and clarifying how the concept of 'materiality' should be applied in making decisions about accounting policy disclosures.

The amendments to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors clarify the differences between changes in accounting policies and accounting estimates and define the estimates as monetary amounts in financial statements that are

subject to measurement uncertainty. The distinction between accounting policies and accounting estimates is important, as changes in accounting policies are generally applied retrospectively, while changes in accounting estimates are applied prospectively.

The amendments to IAS 12 Income Taxes clarify how entities should account for deferred taxes on leases and and decommissioning obligations. The amendments narrow the scope of the initial recognition exemption by not applying it to transactions that result in equal taxable and deductible temporary differences. Therefore, it will be necessary to recognise a deferred tax asset and a deferred tax liability for temporary differences arising on initial recognition of leases and decommissioning obligations.

Amendments to IAS 12 Income Taxes – International Tax Reform – Pillar Two Model Rules. The amendments set out specific accounting and disclosure requirements for income taxes arising from the implementation of tax legislation based on the Pillar 2 Model Rules published by the Organisation for Economic Co-operation and Development (the "OECD").

These amendments do not have significant impact on the Bank`s financial statements.

Disclosure of expected impact of initial application of new standards or interpretations

From 1 January 2024, the following amendments to IFRS will come into effect:

Amendments to IAS 1 Presentation of Financial Statements – Classification of Liabilities as Current or Non-Current;

Amendments to IAS 1 Presentation of Financial Statements – Non-Current Liabilities with Covenants;

Amendments to IFRS 16 Leases – Lease Liability in a Sale and Leaseback;

Amendments to IAS 7 and IFRS 7 - Supplier Finance Arrangements;

Amendments to IAS 21 The Effect of Changes in Foreign Exchange Rates – Lack of Exchangeability

Amendments to IAS 1 Presentation of Financial Statements – Classification of Liabilities as Current or Non-Current It is clarified that liability is classified as non-current if there is the right to defer the liability for at least 12 months. A right to defer settlement must exist at the end of the reporting period. An entity’s right to defer settlement of a liability for at least 12 months after the reporting period must have substance and exist at the end of the reporting period, regardless whether there are plans to use this right. If the right to defer settlement of a liability is subject to the entity complying with specified conditions, such right exists at the end of the reporting period only if the covenants have been met at the end of the reporting period.

Amendments to IAS 1 Presentation of Financial Statements – Non-current Liabilities with Covenants provide that an entity may classify a liability arising from a loan agreement as non-current if the entity's right to defer settlement of the liability is conditional on the entity meeting a covenant that is satisfied within twelve months after the end of the reporting period. In particular, disclosures will be required to be made in the notes to enable users of financial statements to understand the risk that liabilities may become due within 12 months after the end of the reporting period.

Amendments to IFRS 16 Leases explain how sale and leaseback are recognised subsequently to the transaction date. A sale and leaseback transaction is one where the seller-lessee transfers an asset to the buyer-lessor for consideration and leases that asset back for a certain period. The amendments complement the requirements of IFRS 16 on sales and leasesback, thereby supporting the consistent application of the standard. The amendments clarify that a seller-lessee does not recognise a gain or loss in respect of a right of use retained by the seller-lessee. However, this does not prevent a seller-lessee from recognisng a gain or loss relating to the partial or full termination of such a lease in a profit or loss.

Amendments to IAS 7 Statement of Cash Flows and IFRS 7 Financial Instruments: Disclosures - Supplier Finance Arrangements require entities to make disclosures about their supplier finance arrangements that enable users of financial statements to evaluate the effects of those arrangements on an entity's liabilities, cash flows and exposure to liquidity risk.

IFRS S1 and IFRS S2 become effective for annual periods beginning on 1 January 2024. These standards set out disclosure requirements for risks and opportunities relating to sustainability and climate change that could affect an entity's cash flows, access to finance, or cost of capital in the short, medium or long term.

The above mentioned amendments to the standards are not expected to have a significant impact on the financial statements of the Bank.

Note 6. Cash and cash equivalents

Table 6.1. Cash and cash equivalents

(UAH ‘000)

Line	Item	31 December 2023	31 December 2022
1	**2**	**3**	**4**
1	Cash on hand	161,416	223,423
2	Balances with the National Bank of Ukraine (excluding mandatory reserves)	277,571	198,451
3	Correspondent accounts, deposits and overnight loans due from banks	541,605	497,245
3.1	Ukraine	534,008	489,931
3.2	other country	7,597	7,314
4	**Total cash and cash equivalents**	**980,592**	**919,119**

The amounts in this note are used to fill in line "Cash and cash equivalents" of the "Statement of financial position (Balance sheet)".

As at 31 December 2023, the Bank had no investments in short-term loans and overnight loans to other banks that would be attributable to cash under IFRS.

In connection with the military aggression of the Russian Federation against Ukraine, which began on 24 February 2022, cash on correspondent accounts in TRANSCAPITALBANK PAO (Russian Federation) are fully impaired and are reported in line 9 "Restricted cash" of Note 12 "Other financial assets".

12 1	Historical (revalued) cost	107,660	65	35	**107,760**
12.2	Amortisation at the end of 2023	(40,304)	(22)	(35)	**(40,361)**

The amounts in this note are used to fill in line "Property, equipment and intangible assets" of the "Statement of financial position (Balance sheet)".

Line 10 of Table 10.2 reflects the disposal of an intangible asset to increase the cost of a laptop by the cost of MS Office Home and Business software, which is recorded in line 8 of Table 10.

Accumulated amortisation for the year is also analysed in Note 25 “Administrative and other operating expenses”.

PJSC CB GLOBUS does not have:

- property and equipment restricted for possession, use or disposal according to the effective legislation;
- property, equipment and intangible assets pledged as collateral;
- property and equipment decommissioned for sale;
- intangible assets with restricted titles.

There are neither generated intangible assets, nor purchases in a business combination. Impairment losses were not remeasured, assessed or recognised. Impairment losses were not recognised or reversed in profit or loss in accordance with IAS 36. There are no contractual obligations related to the acquisition of property and equipment.

Historical (revalued) cost of fully depreciated property and equipment comprised:

- UAH 37,710 thousand as at 31 December 2023;
- UAH 49,557 thousand as at 31 December 2022.

There were no changes in the carrying amounts recognised based on property and equipment revaluation results during the reporting period.

There have been no impairment losses recognised or reversed directly in equity.

1	2	3
1	**Balance as at 31 December 2021**	**46,584**
2	Establishment and/or increase of provision	8,220
3	Fees and commissions on guarantees issued	96,219
4	Amortisation of fees and commissions received on guarantees issued and recognized in the Statement of profit and loss and other comprehensive income	(60,824)
5	Gains from derecognition of financial liabilities	(23,797)
6	Impact of translation to reporting currency	927
7	**Balance as at 31 December 2022**	**67,329**
8	Establishment and/or increase of provision	26,582
9	Fees and commissions on guarantees issued	132,325
10	Amortisation of fees and commissions received on guarantees issued and recognized in the Statement of profit and loss and other comprehensive income	(90,359)
11	Gains from derecognition of financial liabilities	(28,612)
12	Impact of translation to reporting currency	(21)
13	**Balance as at 31 December 2022**	**107,244**

The amounts in this note are used to fill in line "Provisions for liabilities" of the "Statement of financial position (Balance sheet)".

Provisions for financial commitments are created to secure their fulfilment in the future, which is recognised as a liability in the Bank's balance sheet indicating potential losses due to outflow of economic benefits associated with the fulfilment of such financial liabilities by the Bank.

In the reporting period, the Bank has not drawn on the provisions for granted financial guarantees to fulfil the assumed liabilities.

According to the agreements with customers, the Bank's guarantees and commitments to extend loans expire in 2023-2029. The amount of the fees collected for the guarantees issued is amortised on a straight line basis during the validity period of the guarantees.

Note 16. Other financial liabilities

Table 16.1. Other financial liabilities

(UAH ‘000)

Line	Item	31 December 2023	31 December 2022
1	2	3	4
1	Payables on transactions with payment cards	803	640
2	Payables on transactions with foreign currency	4	6
3	Suspense loans	528	1,149
4	Payables on transactions with banks	39,393	13,281
5	Payables on transactions with the customers	1,451	1,038
6	Payables on lending transactions	2,359	1,763
7	Expenses accrued	168	563
8	Cash on settlements	82,952	54,901
9	Equity instrument containing write-off/conversion clauses	51,399	48,502
10	**Total other financial liabilities**	**179,057**	**121,843**

The amounts in this note are used to fill in the line “Other liabilities” of the Statement of Financial Position (Balance Sheet).

Note 17. Other liabilities

Table 17.1. Other liabilities

(UAH ‘000)

Line	Item	31 December 2023	31 December 2022
1	2	3	4
1	Taxes and duties other than income tax payable	11,278	6,044
2	Payables on asset purchase transactions	22	3
3	Deferred income	2,736	1,970
4	Services payable	4,774	2,691
5	**Total**	**18,810**	**10,708**

The significant increase in payables on taxes and duties (other than income tax) occurred due to accrual of personal income tax and military duty withheld from interest accrued on deposits as at the last day of the year. Interests accrued increased due to an increase in the deposit portfolio of the Bank.

Payables to the Bank's employees at
31 December 2023 amounted to UAH 92,831 thousand
31 December 2022: UAH 33,891 thousand.

The increase in payables to employees occurred due to an increase in the provision for unused vacations and mandatory state insurance contributions to cover unused vacations.

Note 18. Lease liabilities

As at 31 December 2023, a lease liability for the amount of UAH 30,496 thousand measured at the present value of the lease payments outstanding at the reporting date was included in the line "Lease liabilities" of the Statement of Financial Position (Balance Sheet).

Table 18.1. Lease liabilities
(UAH '000)

Note 19. Subordinated debt

Table 19.1 Liabilities on subordinated debt (UAH ‘000)

Line	Item	31 December 2023	31 December 2022
1	2	3	4
1	Subordinated debt	63,818	61,444
2	Interest accrued on subordinated debt	385	371
3	**Total liabilities on subordinated debt**	**64,203**	**61,815**

The amounts in this note are used in the line “Subordinated debt” of the Statement of Financial Position (Balance Sheet).

Subordinated debt in UAH was raised by the Bank from a resident legal entity in November 2013 in the amount of UAH 60,000 thousand.

The subordinated debt has a maturity of 14 years until 2027 at 8.95% per annum.

In case of the Bank's liquidation, the subordinated debt will be repaid after the claims filed by all other creditors have been satisfied.

In 2017, the Bank replaced the investor under the subordinated debt with a non-resident legal entity and obtained the relevant permission from the National Bank of Ukraine.

In 2018, the Bank additionally attracted 2 deposits in US dollars from a resident individual in the amount of UAH 46,524 thousand for a period of 10 years until 2028 at 8% and 9.5% per annum.

In 2020, the Bank received a permission from the National Bank of Ukraine for early termination of the subordinated debt agreement with a non-resident investor and returned the funds in the amount of UAH 60,000 thousand. The non-resident investor (shareholder) resolved to use these funds to provide the Bank with non-refundable financial aid, for which the Bank received required permission from the National Bank of Ukraine to include these funds in the additional capital of the Bank.

Note 20. Share capital and share premium

(UAH '000)

Line	Item	Number of shares in issue (in thousands)	Ordinary shares	Total
1	2	3	4	5
1	Balance as at 31 December 2022	300	300,000	300,000
2	**Balance as at 31 December 2023**	**300**	**300,000**	**300,000**

The amounts in this note are used in line 24 ***"Share capital" of the Statement of Financial Position (Balance Sheet)***.

The number of shares declared for issue is 300,000 (three hundred thousand).

The number of shares issued and paid is 300,000 (three hundred thousand).

Nominal value per share: one thousand Ukrainian hryvnias (UAH 1,000).

There are no preferences or restrictions on the Bank's shares.

There are no options or sale contracts.

The Bank did not take decisions to decrease its statutory capital during the period of its existence.

Note 21. Maturity analysis of assets and liabilities

Based on the requirements of paragraphs 60, 63 of IAS 1 *Presentation of Financial Statements*, the management of the Bank believes that the presentation of the assets and liabilities in in either ascending or descending order of respective liquidity ratios makes the disclosures more relevant and reliable than presentation of such information based on determination of current indicators, whereas the Bank does not deliver goods or services within an operating cycle that can be identified clearly. Therefore, balances on transactions with assets and liabilities have been presented in light of their contractual maturities.

Given that:

- actual maturities of targeted loans for purchase of vehicles and property when the Bank's customers repay loans much earlier than the contractual payments; and
- maturities of individuals' deposits when the vast majority of depositors normally renew their deposits,

management of the Bank believes that liquidity gaps will have an immaterial effect on the Bank's operations.

5	**Basic and diluted earnings/(loss) per ordinary share (UAH)***	**132.81**	**60.20**

*Face value of one share of the Bank is UAH 1,000.00

The amounts in this note are used in the line “Basic and diluted earnings per ordinary and preference share” of the Statement of Profit or Loss and Other Comprehensive Income (Income Statement).

The number and nominal value of the shares are disclosed in Note 20 “Share capital and share premium”.

Note 28. Operating segments

The Bank’s segments represent strategic business units targeting different customers. They are managed separately since each business unit requires different marketing strategies and service levels.

Note 30. Financial risk management

Credit risk is the current or potential risk for proceeds and capital arising from the failure of a counterparty that assumed an obligation to comply with the terms and conditions of any financial agreement with the Bank or otherwise fulfill its obligations.

The key objective of the credit risk management is to create an efficient management system to facilitate the process of achievement of short-term and strategic goals of the Bank applying relevant methods and techniques of managing and controlling the risks generated by external environment, assets and liabilities structure, and the Bank's activity.

The main governance body responsible for the credit risk management is the Board of the Bank authorized to design and implement the Bank's credit risk management system based on internal regulations, procedures, policies, etc. Decisions on approval of loans, factoring transactions, issue of guarantees, suretyships and other commitments on behalf of third persons envisaging their performance in the monetary form, and on leasing transactions in the Bank are adopted on a collegiate basis by the Credit Committee. The Bank has implemented a system of limits on unsecured transactions on placement of funds or sale of financial instruments on the interbank market that are approved during the sittings of the Assets and Liabilities Management Committee of the Bank.

The Bank's policy stipulates calculation of understandable and consistent credit ratings of the loans within the Bank's portfolio, which ensures a persistent management of the underlying risks and comparison of the credit risks within all lines of business of the Bank. Respective risk ratings are analysed on a regular basis.

For the purposes of their rating and evaluation, credit risks are categorized into individual and portfolio risks (bringing rise to specific and collective impairment). Individual credit risks arise in connection with transactions with individual counterparties of the Bank. Evaluation of the individual credit risk requires assignment of a unique credit rating to each such individual counterparty. Portfolio credit risk causes impairment of the assets of the Bank. Evaluation of the portfolio credit risk requires to analyse assets concentration and diversification.

To manage its collective credit risks on the level of its loans portfolio, the Bank applies the following techniques:

- loans portfolio diversification;
- establishment of limits;
- accrual of provisions;
- regular analysis of the loans portfolio quality.

To manage its individual credit risks, the Bank applies the following techniques:

- regular monitoring of financial position of its borrowers and securities issuers;
- monitoring of compliance with established limits and ratios;
- monitoring of collaterals obtained to secure loans granted (regular inspections and revaluations of the collaterals, assessment of impairment of collaterals during the lives of the underlying loans).

Individual credit risk is mitigated by way of:

- obtaining collateral;
- transfer of risks (insurance);
- staged lending process;
- application of higher interest rates where appropriate.

The Bank has established all required provisions for credit transactions. Furthermore, the Bank was in compliance with the statutory ratios of large credit exposures. The credit risk ratios were as follows as at 31 December 2023:

- - (N7) – ratio of maximum concentration of credit risk per single counterparty – 8.3%
- (N8) – large credit risks ratio – 7.6%.

In 2022-2023, active military operations were conducted in a large part of Ukraine and, as a result, most borrowers were not physically able to make timely repayments, regardless of their financial condition (i.e. technical delay due to force majeure). In this regard, the Bank initiated and carried out a number of restructurings under such loans to ensure that the borrowers could properly fulfill their obligations in the future. These restructurings were carried out only for loans characterized by good debt servicing before the introduction of martial law and did not imply deterioration in the Bank's credit conditions.

Market risk is defined as existing or contingent risk affecting the profits and equity of the Bank caused by the adverse fluctuations of the securities, commodities and foreign exchange prices/quotations attributable to the Bank's instruments held for trading. This risk arises in connection with dealing transactions, acceptance of trading positions in debt and equity securities, currencies, commodities and derivative instruments.

In accordance with the strategy, adopted by the Bank, the acceptable market risk limits are adhered by way of:

- determining avoidance of the risk related to trading book instruments;
- approval of limits on open positions;
- compliance with currency positions ratios and limits.

The Bank's market risk management system comprises regulatory documents - regulations, procedures, methodologies, etc. - approved by the Management Board.

Based on the the Bank's short-term development strategy, it is possible to note that the Bank does not intend to extensively utilise its both on- and off-balance sheet investments, therefore, the Bank is not exposed to significant market risks arising in connection with adverse fluctuations of derivative instruments prices.

Currency risk is a potential risk of losses from change in market values of assets or liabilities arising due to fluctuations in foreign exchange rates. Currency risk can be divided into:

- transaction risk;
- foreign currency translation; and
- economic currency risk.

Currency risks arise from foreign exchange rate fluctuations. Sharp foreign exchange rate fluctuations may be caused by both economic and political reasons. The main factor influencing the exposure to foreign currency risk is the Bank’s currency position.

The goal of effective currency risk management is to secure the Bank’s profit and capital and ensure that the Bank’s currency risk profile meets the Bank’s estimates of future exchange rate changes.

The effect of foreign exchange rate changes is assessed by evaluating the Bank’s open currency position.

Exposure to foreign currency risk is measured by:

- open currency position by each foreign currency (i.e. mismatch between on and off-balance sheet items);
- movements in foreign exchange rates determined by market conditions;
- qualification and correctness of measures taken by those who execute agreements on behalf of the Bank, that is, assets and liabilities management.

Due to unstable financial market, the Bank manage its currency position by setting limits. An open currency position limit implies quantitative restriction of the open currency position to equity ratio. Limits are imposed to put bounds to the risk related to exchange rate fluctuations that the Bank is ready to assume. Limits are set both for all currencies and separately for each significant currency.

Due to the introduction of martial law, the National Bank of Ukraine decided to reduce the limits on open currency positions (both long and short) to 5% of regulatory capital, which contributed to further reduction of risk positions.

Interest rate risk is an existing or potential risk to earnings or capital arising from adverse changes in interest rates. This risk affects both the profitability of the Bank and the economic value of its assets, liabilities and off-balance sheet instruments. Hence, the Bank has to place borrowed funds at a higher interest rate linked to a certain maturity. To ensure higher profitability, management should maintain a broader margin between borrowing and lending interest rates based on their maturities. As a part of its assets and liabilities management, the Bank manages the maturities of its rate-sensitive assets and liabilities by gap analysis. Interests on the Bank's assets and liabilities are accrued at a fix interest rate.

Management Board is the main collective body of the Bank in charge of managing its interest rate risks. Assets and Liabilities Management Committee is vested with interest rate risk policy implementation and decision making functions.

Risk Management Office evaluates liabilities and return on assets, performs gap analysis of the Bank's assets and liabilities, evaluates the Bank's net interest margin and spread, and advises Assets and Liabilities Management Committee on changes of interest rates on deposit and credit products.

Operational risk is a potential risk to the Bank's existence arising from deficiencies in corporate governance, internal controls or inadequacy of informational technologies and data processing processes in terms of manageability, versatility, reliability, controllability and continuity of these technologies. Operational risk also arises from inadequacy of IT strategy, policies and utilisation. Other aspects of operational risk include force majeure events such as fire or natural disaster.

Operational risk control framework includes procedures and controls over the risks inherent to the Bank's operations, including compliance control in respect of the Bank's accounting policies and NBU regulations regarding asset valuation methods and reports, IT system controls, and failure-free operation controls, including backup copying and data recovery processes, as well as reserve systems to be used in case of loss of access to or destruction of critical information or technology.

Liquidity risk is defined as an existing or potential risk that arises from the Bank's failure to meet its obligations in due time, without incurring unacceptable losses.

The Bank has the liquidity and solvency framework in place for liquidity and solvency management purposes. The framework addresses two main objectives: the management of the Bank's current payment position, and the management of the Bank's solvency and liquidity for a specific term.

Management Board of the Bank is the principal authority for managing the Bank's liquidity risk. Its powers and capacities include elaboration of liquidity risk policy, as well as approval of relevant policies, guidelines and procedures.

The Bank's Asset and Liability Committee is the executive committee of the Management Board, which is liable for implementation of the liquidity management policy, making current decisions related to liquidity management and approval of internal limits of the Bank. The Bank's liquidity management framework can be divided into three components: day-to-day liquidity management, current liquidity management and long-term liquidity management.

The Bank's key liquidity management methods include:

- analysis of actual liquidity and solvency of the Bank;
- estimation of liquidity and solvency considering planned transactions and actions;
- imposing of limits on the Bank's transactions and setting of liquidity and solvency limits;
- planning of the Bank's transactions, adjusting their terms, etc. for liquidity and solvency management purposes.

As at 31 December 2023, the Bank's liquidity ratios were as follows:
- weighted average LCR for all currencies – 453.6 %;
- weighted average LCR in foreign currency – 169.1%.
- Net Stable Funding Ratio (NSFR) – 314.5%.

Currency risk

Table 30.1. Currency risk analysis

(UAH '000)

Line	Currency	31 December 2023				31 December 2022

5	Total	944,494	(987,240)	-	(42,745)	868,857	(869,128)	-	(271)

The tables below present the amounts in the currencies exposing the Bank to a significant currency risk as at 31 December 2023 considering monetary assets and liabilities not held for trading and expected cash flows.
The analysis envisages assessment of the impact of potential reasonable changes in exchange rates of foreign currencies to the Ukrainian hryvnia based on the assumption of invariance of all other variables disclosed in the income statement of the Bank (due to existence of monetary assets and liabilities not held for trading, whose fair values are sensible to the changes in the foreign exchange rates). The impact on equity does not differ from the impact on the income statement. The negative value presented in the table reflects potential net decrease of the amounts in the income statement or in equity, while the positive values reflect the potential net increases.

Interest rate risk

Interest rate risk is the existing or contingent risk adversely affecting the Bank's profits and equity that arises as the result of adverse movements in the interest rates. This risk affects both the Bank's profit and economic value of its assets, liabilities and off-balance sheet instruments.

Table 30.4. General interest risk analysis

(UAH ‘000)

Line	Item	On demand and less than 1 month	1 – 12 months	More than 1 year	Non-monetary	Total
1	2	3	4	5	6	7
	2023

2	Total financial liabilities	9,310,367	2,033,533	852,152	-	12,196,052
3	Net gap on interest rates at the end of the previous period	(4,772,322)	1,246,648	3,833,467	-	307,793
	2022					
4	Total financial assets	2,667,308	1,252,363	2,501,853	-	6,421,524
5	Total financial liabilities	4,413,491	1,325,446	584,470	-	6,323,407
6	Net gap on interest rates at the end of the previous period	(1,746,183)	(73,083)	1,917,383	-	98,117

The table above presents the financial assets and financial liabilities sensitive to the changes in the interest rates.

The principal interest rate risks to which the Bank is exposed are:

- repricing/mismatch risk that arises from mismatches in maturities (for fixed-rate instruments) between bank assets and liabilities;
- yield curve risk that arises from changes in the slope and shape of the yield curve;
- basis risk is the risk of changes in the interest rate that arises from the imperfect correlation in the adjustment of the rates earned and paid by the Bank on different instruments with otherwise similar repricing characteristics. This risk is not inherent to the Bank.

During the reporting year, due to the introduction of martial law, the National Bank of Ukraine increased the discount rate to 25%, which led to a significant increase in the cost of borrowings on refinancing terms and a sharp decline in the Bank's interest margin and spread.

When assessing its interest rate risk applying the GAP-analysis technique, the Bank focuses on the issues of short-term management of its profits, their stabilization, and improvement of their quality.

For asset-side and lending transactions of the Bank, interests are accrued at a fixed interest rate.

Geographic risk is the risk of losses for the Bank as the result of default of customers or counterparties operating in any specific country and, respectively, affected by the country-specific risks. Whereas the Bank operates predominantly within the territory of Ukraine, geographic risk is an insignificant and secondary segment that does not have any significant impact on the Bank's operations.

Liquidity risk

The Bank manages its liquidity risks primarily applying the technique of maturity analysis of its assets and liabilities. The Bank analyses its liquidity risks in light of maturities based on discounted cash flows.

The tables below disclose the Bank's liabilities at the reporting dates by contractual maturities. The amounts disclosed represent contractual undiscounted cash flows, including total credit related commitments and commitments to extend financial guarantees. Such undiscounted cash flows differ from the amounts reported in the Statement of financial position (Balance sheet), since the carrying amounts are based on discounted cash flows.

The military aggression and the introduction of martial law led to an increase in the GAP in the short term due to the need to increase the maturity of the loan portfolio and reduce the maturity of borrowed resources. However, given the substantial stock of secondary liquidity in the form of the government bonds portfolio, the existing gaps do not have a critical impact on the Bank's liquidity ratios.

Note 31. Capital management

Capital management activities are conducted by the Bank's Supervisory Board by way of fixing targeted capital ratios. The Bank manages its capital adequacy ratios to address the risks inherent in the business. The Bank’s capital management policy is focused at securing the capital adequacy and is controlled through ratios set by the NBU as a result of its supervision over the Bank. The primary objective of the Bank’s capital management is to ensure that the Bank complies with the externally imposed capital requirements and maintains strong credit ratings and healthy capital ratios in order to support its business and to maximise the shareholders’ value. The Bank manages its capital structure and makes its adjustments in the light of changes in the economic conditions and the risk characteristics of its operations. In order to maintain or adjust the capital structure, the Bank may adjust the amount of dividend payments to its shareholders, return capital to its shareholders or issue equity securities.

Table 31.1. Regulatory capital structure

(UAH ‘000)

Line	Item	31 December 2023	31 December 2022

7	Partial amount of the provision for asset-side banking transactions that is included in the income accrued but not received for more than 30 days (prefixed with '-')	146,100	97,200
8	Accrued income recognised by the Bank in purchasing government bonds denominated in foreign currency	-	40

Capital is a key performance indicator of the Bank used to offset the negative effects of various risks the Bank assumes in the course of its operations and to protect customer deposits and ensure financial strength and stability of the Bank's operations.

The Bank was in compliance with the effective statutory capital adequacy ratios in 2023.

As at 31 December 2023, the above ratios were as follows:

N1 - regulatory capital of the Bank comprised UAH 745,728 thousand;
N2 - regulatory capital adequacy ratio was 19.86 %.
N3 - core capital adequacy ratio was 13.17 %.

As at 31 December 2022, the above ratios were as follows:

N1 - regulatory capital of the Bank comprised UAH 519,292 thousand;
N2 - regulatory capital adequacy ratio was 15.84 %.
N3 - core capital adequacy ratio was 13.29 %.

Note 32. Commitments and contingencies

Litigations.

As at 31 December 2023, 20 lawsuits were initiated against the Bank for the total of UAH 52,555 thousand:

- 3 (three) cases regarding collection of cash;
- 2 (two) cases regarding collection of cash under guarantee;
- 5 (five) cases regarding recognition of an executive inscription as unenforceable;
- 3 (three) cases regarding recognition of a bank guarantee as unenforceable;
- 1 (one) lawsuit regarding recognition of an encumbrance as terminated;
- 1 (one) case regarding recognition of the Bank's actions as unlawful;
- 3 (three) cases regarding invalidation and cancellation of the decision of the state registrar and cancellation of property rights;
- 1 (one) case ragarding an obligation to perform certain actions
- 1 (one) case regarding invalidation of a loan agreement.

Management of the Bank believes that the legal proceedings will have no negative effect on the Bank's financial position. Accordingly, the Bank did not create provisions for contingent liabilities.

Capital expenditure commitments.

As at 31 December 2023, the Bank's contractual commitments attributable to purchase of intangible assets comprise UAH 1,475.8 thousand.

Credit-related commitments.

The key aim of these instruments is to ensure provision of cash to customers where needed. Commitments to extend credit represent the undrawn portion of the loans approved for disbursement. In terms of its credit related commitments, the Bank encounters potential risk of losses totalling the amount of undrawn credit commitments where such commitments are risky, i.e. non-revocable, instruments. However, the potential amount of such losses is lower than the total undrawn commitments whereas the major part of the commitments to extend credit is subject to the customers' compliance with certain creditworthiness standards. The credit risk arising in connection with the commitments given is mitigated by way of issuance by the Bank of loans secured by collateral. The Bank closely monitors the terms remaining to its compliance with credit related commitments whereas the long-term commitments are usually characterised by a higher credit risk than short-term commitments.
The Bank evaluates the probability of losses per credit related commitments as remote.

Note 34. Fair values of financial instruments

To increase consistency and comparability in fair value measurements and related disclosures, IFRS 13 establishes a fair value hierarchy that categorises into three levels the inputs to valuation techniques used to measure fair value. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1 inputs) and the lowest priority to unobservable inputs (Level 3 inputs).

Level 1 inputs are the (unadjusted) prices quoted on active markets for identical assets or liabilities, to which the business entity may have access as of the date of estimation;
Level 2 inputs are the inputs (other than quotation prices coming under level 1) observable for an asset or liability either directly or indirectly (open prices).
Level 3 inputs are the inputs for an asset or liability that are not publicly available.

Table 34.1 Analysis of financial instruments at fair value through profit or loss according to fair value hierarchy as at 31 December 2023

Note 35. Subsequent events

The military aggression of the Russian Federation against Ukraine, which began on 24 February 2022, continues.

In the preparation of the financial statements, the Bank exercises the professional judgment regarding the ability to continue as a going concern in the context of martial law.

There were no significant events that occurred between the date of preparation of the interim balance sheet and the date of approval of the Bank's financial statements for the year ended 31 December 2023 that require adjustments and might impact the economic decisions of users.

Approved for issuance and signed on 29 April 2024.

Chairman of the Management Board — Serhiy MAMEDOV

Chief Accountant — Alina LIPATOVA
